Public School Education

In Prince Edward Island, the public school system embodies kindergarten through grade 12. For program planning purposes, four Key Stages categorize grades as follows:

- Key Stage 1 Primary grades of K-3
- Key Stage 2 Elementary grades of 4-6
- Key Stage 3 Intermediate grades of 7-9
- Key Stage 4 Senior high grades of 10-12

The provincial public education program is taught in schools organized within the Public Schools Branch and La Commission scolaire de langue française.

A full school program is available for both English language and French language education. The schools of La Commission scolaire de langue française operate in the French language. Second language courses are available in all schools, with instruction beginning no later than grade four. Early French immersion and late French immersion programs are available in some English language Schools.

Additional information on public education is available on the Department of Education and Lifelong Learning website https://www.princeedwardisland.ca/en/topic/education-and-lifelong-learning

Philosophy of Public Education

A Philosophy of Public Education for Prince Edward Island Schools was adopted in 1990. It contains a statement of the purpose, principles, and goals, summarized below, along with the supporting rationale and context.

Purpose

The purpose of the Prince Edward Island public education system is to provide for the development of children so that each child may take a meaningful place in society.

Basic Principles

Public education in PEI is based on a quality program that respects the intrinsic value of the individual and centres on the development of each child.

The public education system recognizes that education is a responsibility shared among the school, the family, and the community.

The public education system demonstrates respect and support for fundamental human rights as identified in the *Canadian Charter of Rights and Freedoms* and the *PEI Human Rights Act*.

The public education system reflects the character, cultural heritage, and democratic institutions of the society it serves.

The public education system programs reflect a current view of the knowledge, skills, and attitudes and competencies of most worth to the individual and society.

The goals of public education are to enable the student to

- develop an appreciation for learning, an intellectual curiosity, and a desire for lifelong learning;
- develop the ability to think critically, apply knowledge, and make informed decisions;
- acquire the basic knowledge and skills necessary to comprehend and express ideas through the use of words, numbers, and other symbols;
- develop an understanding of the natural world and the applications of science and technology in society;
- acquire knowledge about the past and an orientation to the future;
- develop an appreciation for one's heritage and a respect for the culture and traditions of others;
- develop a sense of self-worth;
- develop a respect for community values, a sense of personal values, and a responsibility for one's actions:
- develop a sense of pride and respect for one's community, province, and country;
- develop a sense of stewardship for the environment;
- develop creative skills, including those in the arts, and an appreciation of creativity in others;

- develop skills and attitudes related to the workplace;
- develop good mental and physical health, and the ability to use leisure time creatively;
- acquire knowledge of the second official language and an understanding of the bilingual nature of the country;
- develop an understanding of gender equity issues and of the need to provide equal opportunities for all;
- develop an understanding of fundamental human rights and an appreciation for the worth of all individuals.

The provincial curriculum is of prime importance in addressing the goals. The curriculum may be defined as all of the experiences, formal and informal, which the student encounters under the school's guidance. This document, Program of Studies and List of Authorized Materials, outlines the formal school program.

Curriculum guides clearly articulate what students are expected to know and be able to do. Delivery of curriculum must reflect these expectations, and there must be an accurate assessment of students' performance concerning the curriculum outcomes.

English Programs

Mandate

The English Education, Programs and Services Division provides quality English language curriculum and support services to teachers and students. It provides leadership and coordination in the development of quality learning opportunities for all students.

There are more than 200 programs and courses in the public school curriculum. With such a large number of courses, course development and renewal are a continuous one. The procedures for conducting such work are described below.

Program and Course Development/Renewal Procedure

Renewal of curriculum begins with the common understanding that Grades K-12 students must be educated to participate in a world of rapid and complex change. This dynamically evolving environment requires that students develop multiple literacies that increase depth of knowledge, and acquire a range of competencies. Students must also develop a desire for personal and collective achievement and a willingness to collaborate for the well-being of themselves, others, and their planet.

With these and other worthy goals in mind, everyone involved in Prince Edward Island students' education must have an in-depth understanding of grade-level expectations for learning in all areas of study.

Since the implementation of the 2006 Student Achievement Action Plan, which resulted from the PEI Task Force report on Student Achievement, curriculum development and renewal has been, and continues to be, a priority. Island teachers continue to be actively involved in working with Department leaders to create and develop provincial curriculum. The goals of curricular renewal are achieved through:

- clarifying expectations, outcomes, standards, and benchmarks for students;
- ensuring relevance and consistency for all students across grade levels and areas of study;
- focusing on central tenets and developing deep understanding within areas of study (which are living disciplines);
- incorporating effective research-based instruction and assessment practices, and providing ease of access and use for teachers; and
- promoting a contextualized and constructivist approach to instruction and learning.

Teachers and Department leaders collaborate in evaluating and selecting appropriate student and teacher resources to support the curriculum with consideration for the following six actions:

- 1. The Department of Education and Lifelong Learning assesses the effectiveness of existing programs and school courses in consideration of the province's educational goals and students' needs. The following information is used as part of the assessment process:
 - a. reports from teachers;
 - b. submissions from school authorities;
 - c. submissions from community groups;
 - d. government studies and initiatives;
 - e. academic and professional literature in education; and
 - f. results of provincial, national and international assessments.
- 2. The decision to proceed, or not, with the development of a revision project is made by the Department based upon:
 - a. the result of the assessment;
 - b. the impact on other existing courses/programs;
 - c. recommendations from appropriate curriculum committees; and
 - d. fiscal considerations.
- 3. The curriculum development work is carried out by an ad hoc curriculum committee in conjunction with a Department of Education and Lifelong Learning leaders. Nominations to a committee are requested from education authorities, and, if appropriate, from educational partners, such as Holland College or the University of Prince Edward Island. The committee
 - a. assesses strengths and weaknesses of the present course or program;
 - b. determines, with reference to provincial education goals and any appropriate foundation documents, the outcomes for the new or revised course;
 - c. evaluates instructional materials;
 - d. outlines a course of studies; and
 - e. makes recommendations on pilot projects and in-service training for pilot teachers.

- 4. Based on recommendations from the ad hoc committee, the leader
 - a. submits a request to the Director for final approval;
 - b. consults with education authorities to identify pilot schools and teachers; and
 - c. ensures that pilot materials are ordered and that appropriate in-service training is carried out.
- 5. The Department of Education and Lifelong Learning monitors the progress of each pilot project and
 - a. recommends discontinuing the project, continuing the project, or proceeding to implement a new or revised course;
 - b. revises, as needed, the course of study to reflect any course changes; and
 - c. makes provision for in-service training and other supports that will ensure effective implementation.
- 6. The Department of Education and Lifelong Learning will prioritize the following areas of learning for program and course renewal;
 - a. essential graduation competencies
 - b. inquiry-based learning
 - c. project-based learning
 - d. experiential learning

Fair Presentation of Cultural and Other Groups

The Department of Education and Lifelong Learning recognizes that fair comment respecting any group is to be assured in school. Furthermore, stereotypes are to be avoided, whether in association with gender or any other characteristic. Therefore, in the curriculum planning process, curriculum committees, curriculum specialists, and the coordinator are directed as follows:

- a. To evaluate aims, instructional materials, and courses of study to ensure fair and reasoned comment upon the characteristics or practices of any cultural group. Fair and reasoned comment is characterized by, for example, providing clear and reasonably complete explanations of characteristics and practices, distinguishing between facts and inferences or value judgements in discussions of characteristics and practices, and discouraging students from making hasty value judgments about characteristics and practices of specific cultures.
- b. To evaluate educational aims, instructional materials, and courses of study to ensure that people's generalizations are based upon reasonable evidence and that stereotypes are avoided.

The resource called *Evaluation and Selection of Learning Resources: A Guide* is used to evaluate instructional materials.

The following guidelines apply in evaluating instructional materials:

- 1. Texts and other instructional materials should portray a wide variety of occupations, activities, and interests as being equally suitable for diverse gender identities.
- 2. Human experiences presented in textbooks should include references to diverse gender identities.
- 3. Messages about society and an individual's place in it should imply the equality of diverse gender identities.
- 4. The resource can be accessed at www.gov.pe.ca/photos/original/ed_ESLR_08.pdf

The Senior High School Program

The senior high school program is a broad one intended to foster students' intellectual, physical, emotional, and cultural growth and development. For students' to be successful, the program must have enough flexibility to address all students' interests and needs as they transition from high school to their first post-high school destination.

Therefore, the goal of Key Stage Four is to consolidate competencies through flexible programming and experiential opportunities. Students will have opportunities to prepare and transition to the workforce or post-secondary education within the high school program of studies.

Codes and Abbreviations

Abbreviations

Most of the instructional materials listed for the school programs and courses described in this document appear as indicated by the following example:

| Title and Author | <u>Publisher</u> | <u>Ratio</u> | <u>Item Number</u> |
|---|------------------|--------------|--------------------|
| Tuesdays With Morrie by Mitch Alborn | BOK | 1/c | 110-10889 |

Please note:

- 1. The publisher abbreviations and the publishers they refer to are listed on the following pages.
- 2. The ratios at which instructional materials are provided have meanings as indicated by the following examples:

1/p - one per pupil
1/10p - one per 10 pupils
1/t - one per teacher
1/c - one per class
1/s - one per school
1/u - one per education authority
1/ws - one per work station

cs/s - one class set per school cs/t - one class set per teacher

3. The stock number is a unique number for each item. The numbers are assigned by the Provincial Learning Materials Distribution Centre (PLMDC).

Graduation Requirements

MINISTER'S DIRECTIVE

No. MD 2020-04

Granting of Senior High Graduation Diploma and Certificate of Accomplishment in the English Language Education Program

Pursuant to clause 3(1) (g) and subsection 4(1) of the *Education Act*, R.S.P.E.I. 1988, Cap. E-.02, I hereby issue the following Minister's Directive to establish rules for the granting of diplomas and provincial certificates of accomplishment in an English language education program, including an education program for French immersion students.

This Minister's Directive replaces Minister's Directive No. MD 2018-01.

Interpretation

- 1. In this Directive,
 - (a) "affiliated school" means an educational institution located outside of Canada that is authorized by the Minister to use curricula developed and approved by the Department;
 - (b) "credit" means:
 - a weighted unit based on the number of defined hours of instruction in a course that is awarded to a student upon successful completion of the course with a pass mark of at least 50%;
 - ii. an enrolled credit:
 - iii. a local course credit; or
 - iv. a passing credit.
 - (c) "English credit" means a credit for a course identified as an English course in the Senior High Program of Studies and List of Authorized Materials;
 - (d) "English language education program" means the education program approved by the Minister under clause 3(2)(b) of the *Education Act* for use in the English school system;
 - (e) "enrolled" means that a student attended a course for which the teacher assessed an assignment or assignments;
 - (f) "enrolled credit" means a credit that is awarded to a student for a course in which they were enrolled in the spring semester of the 2019-2020 school year.
 - (g) "French credit" means a credit for a course identified as a core French or French immersion course in the Senior High Program of Studies and List of Authorized Materials;

- (h) "local course credit" means a course approved by the Department that accommodates the special interests and abilities of students, innovative practices, and addresses local community interest;
- (i) "mathematics credit" means a credit for a course identified as a mathematics course in the Senior High Program of Studies and List of Authorized Materials;
- (j) "passing credit" means a credit awarded to a student in ENG471, ENG571 or ENG671A;
- (k) "physical education credit" means a credit for a course identified as a physical education course in the *Senior High Program of Studies and List of Authorized Materials*;
- (1) "science credit" means a credit for a course identified as a science course in the Senior High Program of Studies and List of Authorized Materials;
- (m) "Senior High Program of Studies and List of Authorized Materials" means the most recent version of the Senior High Program of Studies and List of Authorized Materials, published by the Department of Education and Lifelong Learning, as amended from time to time;
- (n))"social studies credit" means a credit for a course identified as a social studies course in the Senior High Program of Studies and List of Authorized Materials.

PART A - Eligibility

- An individual is eligible to receive a Senior High Graduation Diploma if the individual has successfully completed the course credit requirements for a Senior High Graduation Diploma described in Part B of this Directive and
 - (a) is enrolled in a senior high school operated by the Public Schools Branch; or
 - (b) is enrolled in an affiliated school that, in the opinion of the Deputy Minister, offers courses that are substantially equivalent to courses offered by the Public Schools Branch.
- An individual is eligible to receive a Certificate of Accomplishment if the individual has completed
 the course credit requirements for a Certificate of Accomplishment described in Part C of this
 Directive and
 - (a) is enrolled in a senior high school operated by the Public Schools Branch; or
 - (b) is enrolled in an affiliated school that, in the opinion of the Deputy Minister, offers courses that are substantially equivalent to courses offered by the Public Schools Branch.
- 4. This Directive does not apply with respect to the eligibility of individuals to receive a General Educational Development (GED) Diploma or to receive certification for completion of senior high level courses as an adult learner who is not enrolled in a school operated by an education authority.

PARTB-Academic Requirements for a Senior High Graduation Diploma

4. Sections 5 and 6 apply to individuals who commence studies in a senior high education program in the school year commencing September 2015, or at a later date.

- 5. (1) Subject to subsection (4), an individual who is enrolled in an English language education program has completed the course credit requirements to be granted a Senior High Graduation Diploma if the individual has successfully completed twenty (20) course credits comprised of
 - (a) at least five (5) course credits from courses designated in *the Senior High Program of Studies and List of Authorized Materials* as Grade 12 courses (600 or 800 level courses); and
 - (b) at least twelve (12) course credits from the compulsory course credits described in subsection (3).
 - (2) A course credit may be used to satisfy the course credit requirements described in both clause (1)(a) and clause (1)(b).
 - (3) The compulsory course credit requirements referred to in clause (1)(b) include:
 - (a) 3 English credits, one of which must be ENG 600 level;
 - (b) 2 mathematics credits;
 - (c) 2 science credits;
 - (d) 2 social studies credits, one of which must include Canadian content as listed in the Senior High School Program of Studies or a social studies credit approved by the Director of the English Education, Programs and Services division of the Department as a compulsory course credit:
 - (e) 1 physical education credit, which must be PED401A;
 - (f) 1 career education and personal development credit, one of which must be CEO or CARF;
 - (g) 1 credit from among the following:
 - (i) a credit from a course identified as a creativity or innovation course in the Senior High Program of Studies and List of Authorized Materials,
 - (ii) a French credit, or
 - (iii) a local course credit.
- 6. (1) An individual may apply in writing to the Director of the English Education, Programs and Services division of the Department for an exemption from the following compulsory course credit requirements referenced in section 5:
 - (a) PED401A;
 - (b) CEO;
 - (c) CARF.
 - (2) An individual shall provide the following information with an application for an exemption
 - (a) a description of the reason why the individual should not be required to complete the compulsory course credit requirement;
 - (b) a description of the steps taken by the education authority or affiliated school to accommodate the individual's specific circumstances within the curriculum associated with the compulsory course credit requirement; and
 - (c) a written recommendation from the principal of the school or affiliated school, as the case may be, that the individual be exempted from the compulsory course credit requirement.

- (3) On receiving a completed application made in accordance with this section, the Director of English Education, Programs and Services division of the Department may exempt an individual from a compulsory course credit requirement if, in the Director's opinion,
 - (a) the individual's personal health, religious or physical circumstances prevent the individual from fully participating in the compulsory course, and the health, religious or physical circumstances of the individual cannot be reasonably accommodated within the curriculum of the compulsory course; or
 - (b) the individual has transferred into the education program from another jurisdiction in the individual's third year of study at the senior high level, and enrolment in the compulsory course would unduly delay the completion of the individual's senior high program of studies.
- 7. (1) This section applies to individuals who commence studies in a senior high education program prior to September 2015.
 - (2) An individual who is enrolled in an English language education program has completed the requirements to be granted a Senior High Graduation Diploma if the student has successfully completed twenty (20) course credits comprised of
 - (a) at least five (5) course credits from courses designated in *the Senior High Program* of Studies and List of Authorized Materials as Grade 12 courses (600 or 800 level courses); and
 - (b) at least ten (10) course credits from the compulsory course credits described in subsection (3).
 - (3) A course credit may be used to satisfy the credit requirements described in both clause (2)(a) and clause (2)(b).
 - (4) The compulsory course credit requirements referred to in clause (2)(b) include:
 - (a) 4 English credits or French credits;
 - (b) 2 mathematics credits;
 - (c) 2 science credits; and
 - (d) 2 social studies credits.

PART C-Academic Requirements for a Provincial Certificate of Accomplishment

- 8. (1) An individual who is enrolled in an English language education program has successfully completed the course credit requirements to be granted a Provincial Certificate of Accomplishment if the individual has successfully completed twenty (20) course credits comprised of
 - (a) at least five (5) course credits from courses designated in the Senior High Program of Studies and List of Authorized Materials as Grade 12 courses (600 or 800 level courses); and
 - (b) at least nine (9) course credits from the compulsory course credits described in subsection (3).

- (2) A course credit may be used to satisfy the course credit requirements described in both clause (1)(a) and clause (1)(b).
- (3) The compulsory course credit requirements referred to in clause (1)(b) include:
 - (a) 3 English or French credits;
 - (b) 2 mathematics credits;
 - (c) 2 science credits;
 - (d) 2 social studies credits.
- 9. This directive replaces Minister's Directive No. MD 2018-01, which is revoked.

This Minister's Directive is effective June 3, 2020.

Dated at the City of Charlottetown, this 3rd day of June, 2020.

Brad Trivers

Minister of Education and Lifelong Learning

Creativity/Innovation Courses

The following is a list of course names which are considered a part of the Creativity/Innovation cluster.

- CTE-Automotive 701A, 801A, 801B, 801C, 801D, 801E
- CTE-Carpentry 701A, 801A, 801B, 801C, 801D, 801E
- Computer Studies 521A, 621A
- Creative Multimedia 801A
- Creative Writing 521A
- CTE-Culinary 801A, 801B
- CTE-Design Technology 701A
- Dramatic Arts 701A, 801A, 621A
- Environmental Science 621A
- External Credentials Some courses only:
 - College of Piping
 - Conservatory Canada Music 621 only
 - o Dance Umbrella
 - Island Dance Academy.
 - Royal Conservatory of Music 621 only
 - Skills Canada PEI
- Global Issues 621A, 631A
- Independent Study 521A, 621A
- Music 421A, 421B, 521A, 521B, 621A, 621B, 801A
- CTE-Robotics 801A
- Visual Arts 401A, 501A, 601A, 621A
- CTE-Welding 701A, 801A, 801B, 801C, 801D, 801E

Canadian Content Courses

The following is a list of course names which are considered a part of the Canadian Content Graduation Requirement.

- CAS401A Canadian Studies
- **GEO421A** Geography of Canada
- **HIS621A** Canadian History
- **HIS621B** PEI History
- LAW521A Introductory Law
- LAW531A Introductory Law
- POL621A Advanced Political Studies
- HIS421G Canadian History/Histoire du Canada
- LAW521F Canadian Law/Le droit

Flexible Learning Opportunities

The Prince Edward Island Department of Education and Lifelong Learning offers a number of flexible learning opportunities for students in Prince Edward Island high schools. Flexible learning occurs in situations when the curriculum is not currently part of the Senior High Program of Studies and List of Authorized Materials, the method of curriculum delivery is not in a traditional classroom setting, or both. These opportunities include:

- academy diploma programs;
- cooperative education courses;
- distance education courses;
- external credential courses;
- independent study courses;
- local courses; and
- summer school courses.

Each of these flexible learning opportunities offered to Prince Edward Island high schools will be described below.

Academy Diploma Program

The Academy Diploma Program (ADP) is a specialization program approved by the Department of Education and Lifelong Learning which enables students to gain sector-specific skills and knowledge in the context of engaging, career-related learning environments. ADPs help students to focus on graduation and pursue their post-secondary goals. This program is part of the PEI Career Education Framework, which was developed in 2008, and will assist in the students' transition from secondary school to apprenticeship training, college, university, or the labour market by providing them with real world knowledge, skills, and experiences related to potential future educational and career pathways.

Participating in an ADP:

- enables students to customize their secondary school education to reflect their interests and talents while meeting the requirements for the PEI High School Graduation Certificate;
- enables students to select a bundle of eight to ten required credits focused on sector-specific knowledge and skills that are valued by the sector and post-secondary educational institutions;
- is designed to help prepare students for a post-secondary destination of their choice in a particular economic sector;
- is designed with the flexibility to allow students to shift between pathways (e.g., to switch from a path leading to college to an apprenticeship focus), or to discontinue the program if their career plans change in Grade 11 or 12;
- enables students to provide evidence of achievement of the required components of the ADP (e.g., sector-recognized certifications) for prospective employers and post-secondary educational institutions;
- enables students to explore, identify, and refine career goals, and make informed decisions about their post-secondary options;
- enables students to take part in community based learning opportunities that will help them gain confidence in their ability to be successful, refine skills and work habits, and make informed choices about future career pathways and next steps;

- enables students to participate in pathway exploration experiences aligned with their field of interest;
- enables students to develop skills, knowledge, and work habits related to Literacy and Essential Skills, and the Innovation Skills Profile, which are required in a particular sector, and have the performance of their skills, knowledge, and work habits assessed and documented;
- enables students to enhance the above skills in the context of engaging, sector-specific learning environments; and
- enables students to access resources, equipment, and expertise that may not be available in their school.

<u>The Academy Diploma Program Handbook for Educators</u> is available on-line on the Department of Education and Lifelong Learning website. An updated document will be available and linked in the fall of 2022. Please check with your school to ensure availability.

Cooperative Education Courses (CWS501A/502A/601A/602A)

Cooperative Education is an experiential method of learning that formally integrates classroom studies with learning through productive work experiences in a field related to a student's academic or career goals. It provides progressive experiences in integrating theory and practice. Each cooperative education course is a partnership among students, schools, and the community, with specified responsibilities for each. Each course consists of a mandatory classroom component and a placement component. Prior to the placement, all students must demonstrate an understanding of the pre-placement orientation expectations and participate in the development and implementation of their personalized placement learning plans. These plans outline the specific goals the students, teachers, and employers have regarding opportunities to apply and extend knowledge and practice and refine skills to demonstrate student achievement of placement expectations that reflect current workplace practices and standards.

Distance Education Courses

Distance education is a mode of instruction in which the student and the teacher are separated in either time or space, or both, and where two-way communication takes place through non-traditional means for the most part. There is a broad range of both individualized and team instructional approaches and strategies used in distance education. Distance education communication may utilize various technologies and media, including but not limited to, print, computers and computer networks, telecommunications, and audio-visual equipment and resources.

Distance education is seen as a means to provide students with equitable access and/or a diversity of programs as approved by the PEI Department of Education and Lifelong Learning. Typically, this option is employed when a particular high school does not have the capacity to offer a particular course. All distance education requests must approved by the PEI Department of Education and Lifelong Learning.

External Credential Courses

External credential courses acknowledge the value of student learning outside the public school system by recognizing, for high school credit, credentials obtained outside of regular school instructional time by an education service agency external to the public school system. External high school credit will be awarded for courses, programs, or assessments that have been evaluated and that match or exceed provincial high school standards. External credentials must contribute to the Essential Graduation Competencies, and must meet the standards defined in Minister's Directive MD 11-01. External

credentials will be reflected on the student's high school transcript, thereby enhancing the transcript for the student.

Following is a comprehensive list of all external credentials that are currently available to all Prince Edward Island high school students. New providers may be given credential status during the school year, provided they are granted approval by the External Credential Advisory Committee.

Independent Study Courses (ISC521A/621A) ©

The Independent Study Course allows students to engage in personally meaningful, authentic, real-world learning within an inquiry and problem-solving framework. Students have the opportunity to investigate a self-selected topic or theme that extends the curriculum of an authorized provincial course(s) and

contributes to their knowledge, skills, and attitudes necessary for lifelong learning. The Independent Study Course should be a student-directed investigative project that is planned in collaboration with a supervising teacher and a community mentor, is monitored frequently, and allows the student to assume the role of first-hand inquirer. This study should uncover new questions and ideas for further inquiry and may solve real-life community issues. This course will showcase a student's care, attention to detail, and overall pride in their work while requiring a considerable commitment of time, effort, and energy on the part of the student. Early planning is required for a student to enroll in this course. Independent Study Courses are developed cooperatively by the student and a supervising teacher, and approved and supported by the parent/guardian(s), supervising teacher, school counsellor, and school principal. Final approval is required by the Department before a student can begin the Independent Study Course. Independent study courses can be taken as a Grade 11 credit (ISC521A) or a Grade 12 credit (ISC621A). The Independent Study Course 521A/621A Curriculum Guide and application forms are available online: https://sites.google.com/cloud.edu.pe.ca/isc-curriculum-document-update/home

Local Courses

The Department of Education and Lifelong Learning is committed to ensuring that all students have access to a quality education. The Department is also committed to meeting the changing needs of students by encouraging flexibility and discretion at the local level. Over a number of years, provincially authorized senior high local courses have been offered to accommodate the special interests and abilities of students, to provide for innovative practices, and to address local community interests through the development of local courses at the senior high level which do not duplicate provincially authorized courses.

All schools offering the senior high program must ensure students meet the provincial graduation requirements. This is done by offering provincially developed and authorized courses. Schools may also enhance their programs by offering local courses, if this can be accomplished given sufficient numbers and interest. Local courses are developed at the school level. As a result, course offerings will vary greatly from school to school. However, all local courses that are developed must conform to departmental standards of curriculum development.

Currently, there exists a moratorium on the development of new local courses.

Summer School Courses

Each summer, the Department of Education and Lifelong Learning offers some high school courses at selected locations. The courses offered vary from year to year, and depend on the availability of resources required and student demand. Summer school programming information is typically made available to schools in mid to late May.

Granting of Credit for Educational Activities Not Provided by an Education Authority

MINISTER'S DIRECTIVE No. MD 2016-05

Pursuant to sections 3(1) (g) and subsection 4(1) of the *Education Act*, R.S.P.E.I. 1988, Cap. E-.02, I hereby issue the following Minister's Directive concerning the granting of credit for educational activities not provided by an education authority:

Interpretation

- 1. In this Minister's Directive, an educational activity is comparable in content and learning outcomes to a course offered by an education authority, if the opinion of the Department, at least 75% of the educational activity corresponds to the content and learning outcomes of the education authority course;
- 2. For the purposes of determining the residency of a student in sections 6 and 10 of this Minister's Directive, a student is considered resident in the other jurisdiction if, when enrolled in the educational activity,
 - (a) the student was entitled to free school privileges in the public education system of that jurisdiction; or
 - (b) the student physically resided in the other jurisdiction.
- 3. Nothing in this Minister's Directive shall be construed as restricting the authority of the education authority to determine the placement of students who transfer from an out-of-province education system in accordance with the students' needs, their educational attainments and education authority policy.

Home Education Programs

4. An education authority shall not grant credit to a student for educational activities provided through a home education program.

Private School Programs and Courses

- 5. An education authority may grant credit to a student for an educational activity provided by a private school in Prince Edward Island. The credit granted shall be for the equivalent course offered by the education authority if the educational activity is comparable in content and learning outcomes to the course offered by the education authority.
- 6. An education authority may grant credit for an educational activity provided by a private school located in a jurisdiction other than Prince Edward Island, provided that the student completed the activity while resident in the jurisdiction where the private school is located. The credit granted for the educational activity shall be for the equivalent course offered by the education authority if the educational activity
 - (a) is comparable in content and learning outcomes to the course offered by the education authority; and
 - (b) is recognized by the government of the jurisdiction where the private school is located as being equivalent to a course offered within the jurisdiction's public education system.
- 7. An education authority may grant credit to a student for an educational activity provided by a private school that is not equivalent to a course offered by the education authority.

Programs and Courses authorized by the Minister

- 8. An education authority may grant credit to a student for an educational activity that is authorized by the Minister. If the educational activity corresponds to a course provided by the education authority, the credit granted shall be for the equivalent course offered by the education authority.
- 9. Course or programs offered by the Government of Prince Edward Island and the Atlantic Provinces Special Education Authority are hereby recognized as courses or programs authorized by the Minister for the purposes of section 8.

Programs and Courses approved by other Provincial and Territorial Governments

- 10. An education authority may grant credit to a student for an educational activity that is authorized by another provincial or territorial government for use in that jurisdiction's public education system if the student completed the activity while he or she was resident in that jurisdiction.
- 11. The credit granted for the educational activity under section 10 shall be the equivalent course offered by the education authority if the educational activity is comparable in content and learning outcomes to the course offered by the education authority, as determined by the Department.

Education authority officials are required to consult with the Department to confirm equivalency of courses from other jurisdictions with courses within the Prince Edward Island curriculum.

Distance Education Courses

- 12. An education authority may grant credit to a student for an educational activity provided through a distance education course or a correspondence course, during or outside of normal school hours, if
 - (a) the course is approved by the Department;
 - (b) the student's participation in the course is supervised by a teacher or a person who is registered as a teacher in another province or territory; and
 - (c) the course is approved by the principal of the student's school as being appropriate for the student's academic program prior to the commencement of the course.
- 13. The credit granted for the educational activity under section 12 shall not be for the equivalent course offered by an education authority unless it is approved as an equivalent credit by the Department.

External Credentials

14. An education authority may grant credit to a student for an educational activity that is provided by an external provider if the activity and education service agency are identified in the *External Credential Policy*, published by the Department of Education, Early Learning and Culture, as amended from time to time. The education authority's ability to grant credit under this section is subject to the conditions and limitations set out in the *External Credential Policy*.

This Minister's Directive comes into effect on September 1, 2016.

DATED at the City of Charlottetown, August 31st, 2016

Doug Currie

Minister of Education, Early Learning and Culture

Course Coding System

Course Coding System — Grades 10 to 12

Each unique course code is composed of seven characters, with a course title associated with it.

Example: MAT521A – Foundations of Mathematics 11

| Subject Description | Grade | Category | Credit Value | Program Identifier The seventh character is used as a program identifier as well as to distinguish between courses that would otherwise be identical in their coding. |
|---------------------------------------|--|--|---|--|
| (3 characters) MAT | (1 character) 5 | (1 character) 2 | (1 character) 1 | (1 character) A |
| e.g., MAT = mathematics HIS = history | 4 = Grade 10 5 = Grade 11 6 = Grade 12 7 = Grade 10 or 11 8 = Grade 11 or 12 9 = Grade 10, 11, or 12 | 0 = Open 1 = Enriched or Advanced 2 = Academic 3 = General 5 = Practical 6 = Modified 7 = Intervention | 0 = no credit (for Grades 7-9) 1 = one credit 2 = two credits 3 = three credits 4 = four credits 5 = one half credit | A to E, K = English- language courses F to J = French immersion courses M to Q = French- language courses S = AP and IB courses T = external credential courses W to Z = local program courses |

English Programs – Course Descriptions

ARTS

Visual Arts Courses

ART401A - Visual Arts 🔍

This introductory course provides a study of basic art skills such as drawing, painting, printmaking, and creating three-dimensional forms. There is a strong emphasis on the elements of art, basic colour theory, and drawing skill development. Students will learn to put their artmaking into a context of art history from prehistoric and Indigenous cultures from around the world to Greek and Roman times. As well, students will learn to critically view and articulate about visual images they view and create. Students will be required to create, collect, record, explore, and reflect in their workbook and portfolio on a regular basis.

This course is a recommended prerequisite for ART501A.

ART501A - Visual Arts 🍑

This course builds upon the knowledge, skills, ideas, and experiences introduced in ART401A. Students are expected to use more sophisticated drawing, painting, printmaking, and sculpturing/crafting techniques in their art making. The main focus of the course is to develop originality in their compositions through applying a working knowledge and skills of the elements and principles of art and design, and spatial understanding. Students will learn to critically view using the appropriate vocabulary to examine the art and artists of Indigenous culture and the Renaissance to the Impressionist time period and apply the knowledge in their art making. There is a stronger emphasis on self-criticism and working independently. Students will continue to create, collect, record, explore, and reflect in their workbook and portfolio on a regular basis.

Prerequisite: ART401A or permission from the teacher (based on level of skill and knowledge)

ART601A - Visual Arts

This course builds upon the skills, concepts, media, techniques, ideas, and experiences developed in ART501A. Students are expected to develop and demonstrate growth in their proficiency of skills; use of artistic concepts; exploration of media and techniques; gathering of information and knowledge; reflecting historical and cultural awareness; divergent thinking when problem-solving; support for the values and principles of sustainability in our world; and communication of ideas, thoughts, feelings, and inspirations. Students will reflect on and share how the above is combined in their artwork to create and express a strong visual statement/message. Students will critically view an artwork using the skills of a persuasive argument. They will examine art and artists of the modern and contemporary art movements of various cultures, and apply this knowledge to their artwork. Students will select and describe three pieces of artwork that represent their growth in a year-end exhibition. The ART601A course has a strong emphasis on self-criticism and working independently. Students will continue to create, collect, record, explore, and reflect in their workbook and portfolio on a regular basis.

Students will be expected to reassess their artist statement periodically throughout the semester and add, delete, and modify to represent their way of thinking, doing, and expressing.

Prerequisite: ART501A or permission from the teacher (based on level of skill and knowledge)

ART621A - Visual Arts ©

This course builds upon the skills, concepts, media, techniques, ideas, and experiences developed in ART501A. Students are expected to develop and demonstrate growth in their proficiency of skills; use of artistic concepts; exploration of media and techniques; gathering of information and knowledge; reflecting historical and cultural awareness; divergent thinking when problem-solving; support for the values and principles of sustainability in our world; and communication of ideas, thoughts, feelings, and inspirations. Students will reflect on and share how the above is combined in their artwork to create and express a strong visual personal statement/message. Students will critically view a comparative study of two artworks using the skills of a persuasive argument. They will examine art and artists of the modern and contemporary art movements in various cultures, and apply this knowledge to their artwork and writings.

In the first half of the semester, students will be expected to use their artistic statement and artwork as a guide to select an artist/culture/artistic style to research for an inquiry-based project. Students are expected to present their research in both visual and written form. In the second half of the semester, students are expected to create a community-based project that develops a close relationship between investigation and a purposeful, creative process in their artwork and writings. The community-based project will encourage students to understand themselves and their relationship to each other and the wider community. Both the inquiry-based project and the community-based project encourage a respect for cultural and aesthetic differences, and promote creative thinking and problem solving.

Students will be expected to exhibit and present a body of three artworks that supports their exploration, research, and experience from the following:

- the development of their artistic thought and voice;
- an inquiry-based project; and
- a community-based learning project.

The ART621A course has a strong emphasis on self-criticism and working independently. Students will continue to create, collect, record, explore, and reflect in their workbook and portfolio on a regular basis. Students will be expected to reassess their artist statement periodically throughout the semester and add, delete, and modify to represent their way of thinking, doing, and expressing.

Prerequisite: ART501A or permission from the teacher (based on level of skill and knowledge)

Dramatic Arts Courses

DRA701A - Dramatic Arts

DRA701A is an introductory course in drama, focusing on the personal growth of the student. Through extensive work in improvisation in both small and large groups, students gain confidence as they explore and communicate ideas, experiences, and feelings in a range of dramatic forms. Students will analyze, experience, and perform scripts through the study of movement and speech.

Students will be required to create, collect, record, explore, and reflect in their logbook/blog and portfolio on a regular basis.

DRA701A is the foundation for all future course work in drama and theatre. This course is a recommended prerequisite for DRA801A and DRA621A.

DRA801A - Dramatic Arts

This course will focus on the technical aspects of theatre production. Students will be expected to work collaboratively with their classmates on a class production. It will build upon technical skills, concepts, techniques, ideas, knowledge, and experiences in DRA701A, plus they will be introduced to a foundational component that will explore and examine theatre production, script writing, and acting. Students will critically view the technical approach to dramatic works and discuss their findings using the skills of a persuasive argument. They will examine dramatic genres, time periods, cultures, and styles, and apply this knowledge to the technical production of a dramatic work.

Students are expected to develop and demonstrate growth in their proficiency of technical skills; use of artistic concepts; exploration of media and techniques; gathering of information and knowledge; reflecting historical and cultural awareness; divergent thinking when problem-solving; support for the values and principles of sustainability in our world; and communication of ideas, thoughts, feelings, and inspirations.

This course has a strong emphasis on self-criticism and working independently. Students will continue to create, collect, record, explore, and reflect in their logbook/blog and portfolio on a regular basis. Students will be expected to develop and reassess their artist statement throughout the course.

Prerequisite: DRA701A or permission from the teacher (based on level of skill and knowledge)

DRA621A - Dramatic Arts 🔍

This course will focus on the creation of a collaborative dramatic work of art through a Project Based Learning (PBL) approach. It will build upon the skills, concepts, techniques, ideas, knowledge, and experiences in DRA701A, plus they will be introduced to a foundational component that will explore and analyze theatre production, script writing, and acting. Students will critically view dramatic works using the skills of a persuasive argument. They will examine dramatic genres, time periods, cultures, and styles, and apply this knowledge to the creation of their selected focus in their dramatic work. Students will present the results of their PBL in a performance and in a reflective presentation.

Throughout this course, students are expected to develop and demonstrate growth in their proficiency of skills; use of artistic concepts; exploration of media and techniques; gathering of information and knowledge; reflecting historical and cultural awareness; divergent thinking when problem-solving; support for the values and principles of sustainability in our world; and communication of ideas, thoughts, feelings, and inspirations.

This course has a strong emphasis on self-criticism and working independently. Students will continue to create, collect, record, explore, and reflect in their logbook/blog and portfolio on a regular basis. Students will be expected to develop and reassess their artist statement throughout the course.

Prerequisite: DRA701A or permission from the teacher (based on level of skill and knowledge)

Music Courses

PEI's Music Curriculum is broadening its scope! Learners will have the opportunity to explore a variety of instruments and styles of music, while working with peers, or individually. The intent of the curriculum is to promote lifelong learning and enjoyment of music, while developing the whole musician through musical literacy, interculturally diverse music, collaboration and creativity.

Instrumental Music Performance

MUS421A – Music 🍑

Music 421A will refine and build upon musical concepts, skills, and knowledge from the Grade 9 instrumental music program. There will be a strong emphasis placed on performing in small and large ensembles. Topics include performing a wide variety of music from different styles and time periods. technical skill and fluency, ear training, music literacy, and composition/improvisation. This course is a prerequisite for Music 521A.

Prerequisite: Grade 9 Instrumental Music or permission from the teacher (based on musical level)

MUS521A – Music 🍑

Music 521A will refine and build upon musical concepts, skills, and knowledge from MUS421A.. There will be a strong emphasis placed on performing in small and large ensembles. Topics include performing a wide variety of music from different styles and time periods, technical skill and fluency, ear training, music literacy, and composition/improvisation. This course is a prerequisite for Music 621A.

Prerequisite: Music 421A or permission from the teacher (based on musical level)

MUS621A – Music ©

Music 621A will refine and build upon musical concepts, skills, and knowledge from MUS521A.. There will be a strong emphasis placed on performing in small and large ensembles. Topics include performing a wide variety of music from different styles and time periods, technical skill and fluency, ear training, music literacy, and composition/improvisation.

Prerequisite: Music 521A or permission from the teacher (based on musical level)

Vocal Music Performance

MUS421B – Music 🍑

This course is a performance-based music course designed for the student who has an interest in singing and choral music. Students will improve their singing skills through improved sight-singing, ear training, and note and rhythm reading. They will be exposed to a variety of choral singing genres including classic, vocal jazz, gospel, and show choirs and will prepare and perform various styles of music in a variety of solo, small ensemble or choral settings. Build confidence, expression, and performance skills in a variety of settings while exploring a number of musical styles.

MUS521B – Music 🔍

This course is a continuation of Music 421B. It is a performance-based music course designed for the student who has an interest in singing and choral music. Students will improve their singing skills through improved sight-singing, ear training, and music literacy. They will be exposed to a variety of choral singing genres including classic, vocal jazz, gospel, and show choirs and will prepare and perform various styles of music in a variety of solo, small ensemble or choral settings. Build confidence, expression, and performance skills in a variety of settings while exploring a number of musical styles.

Prerequisites: Music 421B

MUS621B – Music 🍑

As a continuation of Music 521B, this course is a performance-based music course designed for the student who would like to continue rigorous study in vocal music. Students will improve their singing skills through improved sight-singing, ear training, and music literacy. They will be exposed to a variety of choral singing genres including classic, vocal jazz, gospel, and show choirs and will prepare and perform various styles of music in a variety of solo, small ensemble or choral settings. Build confidence, expression, and performance skills in a variety of settings while exploring a number of musical styles.

Prerequisites: Music 521B

Popular Music Performance

MUS421C – Music 🍑

Popular music performance is a learner driven class that could be made up of small groups or individuals working towards goals they have designed. A wide variety of musical styles, intercultural diverse music, and ensembles are possible. Learners will develop an artist's statement and action plan to begin working through the creative process. Learners are expected to perform publicly. Learners are encouraged to make connections with other like-minded musicians/mentors in the community. Some possibilities may include:

- Rock Band
- Traditional Music (Celtic, Acadian, African, and more)
- RnB Band
- **Individual Studies**
- **Jazz** Ensemble
- Songwriting
- **Improvisation**

Prerequisites: Application and/or audition, or permission from the teacher based on skill and knowledge

MUS521C – Music 🍑

Popular music performance is a learner driven class that could be made up of small groups or individuals working towards goals they have designed. A wide variety of musical styles, intercultural diverse music, and ensembles are possible. Learners will develop an artist's statement and action plan to begin working through the creative process. Learners are expected to organize and participate in a public performance. Learners are encouraged to make connections with musicians/mentors in the community. Some possibilities may include:

- Rock Band
- Traditional Music (Celtic, Acadian, African, and more)
- RnB Band
- Individual Studies
- Jazz Ensemble
- Songwriting
- **Improvisation**

Prerequisites: 421C Popular Music Performance, Application and/or audition, or permission from the teacher based on skill and knowledge

MUS621C – Music ©

Popular music performance is a learner driven class that could be made up of small groups or individuals working towards goals they have designed. A wide variety of musical styles, intercultural diverse music and ensembles are possible. Learners will develop an artist's statement and action plan to begin working through the creative process. Learners are expected to prepare and perform a showcase of their work. Learners are encouraged to make connections with musicians/mentors in the community. Some possibilities may include:

- Rock Band
- Traditional Music (Celtic, Acadian, African, and more)
- RnB Band
- **Individual Studies**
- **Jazz** Ensemble
- Songwriting
- **Improvisation**

Prerequisites: 521C Popular Music Performance, Application and/or audition, or permission from the teacher

MUH801A - History of Rock and Roll

This course will introduce students to a study of popular music from the 1950s to the 1970s. Students' learning will center around the following: an examination of music in our lives, including its roles, genres, social context, and ways that it is experienced; distinguishing between listening and hearing (active and passive listening); and developing an understanding of terms and concepts associated with the elements of music that enable students to consider and discuss what they listen to, using the language of music.

BUSINESS EDUCATION

ACC621A – Accounting Principles

Accounting Principles (ACC621A) is a full-credit course offered at the Grade 12 level. The course is designed for students who plan to take accounting courses at the college or university level, however, it is important to note that the knowledge and skills learned throughout this course can be applied across a broad range of disciplines and occupations, and support people in their daily lives. The major areas of study within ACC621A include accounting fundamentals, the accounting cycle for a service and merchandising business, and internal control, financial analysis and decision making. Students will also apply accounting practices in a computerized environment.

The Department of Education and Lifelong Learning and Holland College recognize Accounting Principles - ACC621A as a dual credit course. In the simplest of terms, dual credit refers to a course where high school students earn both high school and post-secondary credits concurrently for the same course. Therefore, all students who have successfully completed ACC621A, and have achieved a grade of 60% or greater, will be exempt from taking the equivalent course at Holland College (ACCT1001). ACCT1001 is found as either an elective or a core course in the following Holland College programs:

- Golf Club Management;
- International Hospitality Management;
- Marketing and Advertising Management;
- Tourism and Travel Management; and
- Sport and Leisure Management.

ACC801A - Accounting

Accounting is designed as a foundation course in fundamental accounting principles, terminology, the significance of accounting in business, and accounting processes as applied to manual and automated data processing systems. The course stresses the preparation and maintenance of basic accounting records as a basis for further study, entrance to employment, or personal use.

This course will have entrance recognition at Holland College with the curriculum designed to link to post-secondary opportunities in the study of accounting and business.

BUS701A – The World of Business

This course provides students with an introduction to the functional areas and concepts of business. Topics to be covered include economics, production, human resource management, marketing, accounting, finance, leadership and management, entrepreneurship, and international business. Within the final unit, students will demonstrate their ability to apply these concepts to practical real-world situations by completing a business evaluation. Students will make connections among the various themes by exploring local, regional, national, and global business events, and infusing them into the dialogue and discussions on the topics covered within the course. This course provides students with the confidence and competence to engage in the world of business while building a solid foundation for students interested in pursuing further studies in ACC621A, ECO621A, and ENT521A.

ENT521A - Entrepreneurship

This course is designed to introduce students to the business application of enterprising knowledge, skills, and abilities. Students will explore and develop their entrepreneurial competencies as they cooperate on the planning and implementation of a mini-venture and individually plan a business venture.

Topics will include:

- identifying opportunities;
- assessing risk;
- generating and refining ideas;
- marketing;
- organization options;
- financing and financial management.

Learning resources will include speakers, videotapes, software, and current print resources. Learning activities will involve group and individual projects.

This course will have entrance recognition at Holland College with the curriculum designed to link to post-secondary opportunities in the study of accounting and business.

LED621A – Leadership (Formally PED621 – Physical Education Leadership)

This course will enable students to personally develop their leadership attributes, skills, and styles needed to create, plan, lead, and safely implement projects that will enhance the well-being of self and others. By building on a foundation of leadership concepts and theories, students will have many opportunities to apply their learning to develop effective communication strategies, group dynamics, and teamwork skills, and become more socially and personally responsible for their actions. Students will extend their leadership abilities and discover service learning opportunities to model effective leadership both within and beyond the classroom. This course will allow students to take pride in their learning by presenting evidence of their personal leadership and how this growth will benefit them in all areas of their lives.

OMT801A – Office Management Technologies

Technology continues to expand the role of the office professional as automation changes the way in which businesses function. From a one-person office to large organizations, there is need for individuals with a variety of computer skills, human relations skills, teamwork capabilities, and analytical thinking skills who can contribute to the effectiveness of their organization. Topics in the Office Management Technologies course include workplace expectations and ethics, office procedures, word processing and keyboarding enhancement, business communications, time management, telephone procedures, business correspondence, records management, and reprographics. Employability skills and career exploration activities are embedded throughout the course.

Early planning is required for a school to offer this course. Please contact the K-12 Learning Technology & Innovation Leader to discuss curriculum information, teacher training, and equipment requirements for this course.

CAREER EDUCATION

CEO401A – Career Explorations & Opportunities

Career Explorations and Opportunities is a course that enables students to develop the skills they need to become self-directed individuals who set goals, make thoughtful decisions, and take responsibility for pursuing their goals throughout life. Students will develop a personal career portfolio as they move through the career development process focusing on the following questions: Who am I? What are my opportunities? What are my next steps and why? What is my action plan? Throughout this process, students will increase self-awareness, explore a wide range of education and career options, think critically about their decisions, develop financial literacy skills, and begin planning their career pathway.

By helping students understand the knowledge, skills, and attitudes considered essential in today's labour market, this course helps to prepare students to achieve greater success in our ever-changing global economy. It also provides opportunities for students to learn how to manage their lives more purposefully and effectively, enhance their personal well-being, and realize their full potential.

CWS501A and CWS502A/B – Cooperative Education CWS601A and CWS602A/B – Cooperative Education

Cooperative Education is an experiential method of learning that formally integrates classroom studies with learning through productive work experiences in a field related to a student's academic or career goals. It provides progressive experiences in integrating theory and practice. The Cooperative Education course is a partnership among students, schools, and the community, with specified responsibilities for each. This course consists of a classroom component and a placement component. Prior to the placement, all students must demonstrate an understanding of the pre-placement orientation expectations and participate in the development and implementation of their personalized placement learning plans. These plans outline the specific goals that the students, teachers, and employers have regarding opportunities to apply and extend knowledge and practice, and refine skills to demonstrate student achievement of placement expectations that reflect current workplace practices and standards.

Course Codes

Schools may offer two credit or one credit cooperative education courses. The following course codes are authorized: CWS501A, CWS601A, CWS502A, CWS502B, CWS602A, and CWS602B.

Credit Guidelines

A maximum of four cooperative education credits are recognized for high school graduation purposes. Under exceptional circumstances, and with authorization of the Director of Public Schools Branch and school principal, the maximum allowable cooperative education credits for high school graduation may be increased to eight. Pre-placement orientation for a first time cooperative education student must be a minimum of forty hours.

DYF701A – Designing Your Future

In the Designing Your Future course, students use problem-solving and inquiry to develop new learning opportunities for enhanced personal growth while preparing them for successful transition to life, learning, and work after high school. Students will explore the realities and opportunities in the workplace and examine factors that impact personal success, while developing an action plan to help realize their goals and reach their full potential. Students further develop their career portfolio, focusing on developing essential skills to ensure a successful transition from high school. Students will participate in real world experiences that will help foster the development of communication, collaboration,

teamwork, and problem solving skills, while reinforcing the notion that learning is a lifelong journey.

Successful completion of DYF701A or CEO401A is a prerequisite for Transitions 702Y.

PHP501A – Peer Helping

Students enrolled in this course will have an opportunity to earn a credit while helping and supporting the learning of other students with special, unique educational needs. Peer helpers assist students in meeting the many challenges they encounter in differentiated learning environments and in the resource room.

After being selected through an application process, successful applicants will participate in a brief training program outlining the roles and responsibilities of peer helpers and are provided with strategies and techniques to utilize while meeting the specific individual needs of his/her assigned student(s). Peer helpers will facilitate one-on-one learning with students and are closely monitored by the classroom teacher and peer helping teacher.

PHP601A – Peer Helping

Students enrolled in this course will have an opportunity to earn a credit while helping and supporting the learning of other students with special, unique educational needs. Peer helpers assist students in meeting the many challenges they encounter in differentiated learning environments and in the resource room.

After being selected through an application process, successful applicants will participate in a brief training program outlining the roles and responsibilities of peer helpers and are provided with strategies and techniques to utilize while meeting the specific individual needs of his/her assigned student(s). Peer helpers will facilitate one-on-one learning with students and are closely monitored by the classroom teacher and peer helping teacher.

This group of peer helpers will enhance their understanding of the students to which they are assigned by researching the students' particular conditions and contributing ideas to the development of the students' Individual Education Plans (as appropriate). Selection of these peer helpers will stem from successes observed in the PHP501A program and successful completion of the referral and application process.

Through special consideration, students may take PHP601A without having taken PHP501A.

CAREER AND TECHNICAL EDUCATION

Automotive

AUT701A – Introduction to Auto Service Technology

Introduction to Auto Service introduces students to tools, equipment, theories, and practices common to the trade with a constant emphasis on safe work habits. In this course, students will learn how to communicate effectively and present themselves professionally; assemble components using a variety of fasteners and adhesives; perform basic heating, cutting, and welding procedures; diagnose and service wheels and tires, and perform basic maintenance.

AUT801A – Basic Powertrain

A basic working knowledge of the major systems of a vehicle is essential for any auto service technician. The basic powertrain course introduces students to engine operation, cooling systems, and vehicle drivelines. Students will learn about the operation of internal combustion engines and various fuel types and practice performing accurate measurements using a variety of common measuring tools. Students will conduct tests and service vehicle cooling systems, and learn to diagnose and repair problems related to vehicle drivelines.

AUT801B – Brake Systems

Brakes are one of the most fundamental safety systems on a vehicle. This course focuses on the components, types, service, and diagnosis of brake systems. Students will develop a clear knowledge of the fundamentals of friction and hydraulics related to brake component function. They will learn to service, repair, and diagnose drum brake systems, disc brake systems, and power brakes, and will be introduced to anti-lock brake systems.

AUT801C – Electrical Systems

Today's automobiles use electricity to operate many different devices and systems. During this course, students will develop a basic understanding of electrical principles, fundamentals of magnetism, and scientific principles related to vehicle electrical systems. They will learn to service, test, and diagnose problems related to batteries. They will service and repair basic electrical circuits, use electrical meters, and scan tools to test and diagnose vehicle electrical systems.

AUT801D – Steering Systems

The steering gear mechanism is an integral component of any vehicle system. Students will learn how to diagnose and correct problems related to vehicle steering components. They will also learn about the service and repair of manual and power steering systems, steering columns, and basic frame construction.

AUT801E – Suspension Systems

Suspension and steering components are second only to brakes among the most crucial safety systems in any vehicle. Students will learn about common steering angles and how each affects vehicle handling, and about basic alignment procedures. They will also learn to diagnose and correct problems related to vehicle suspension and steering components and perform a standard motor vehicle inspection.

Carpentry

CAR701A – Introduction to Carpentry Technology

Introduction to Carpentry Technology is a project based course where students can expect to be engaged in carpentry projects that will develop their technical skills and challenge their critical thinking. CAR701A provides students the opportunity to develop technical skills with tools, equipment, and safe work practices within a Carpentry setting. Students will be challenged to apply math concepts to solve technical problems and develop their literacy skills through design and drawing techniques. Students are expected to develop safe work habits, effective time/project management skills and work effectively with others.

CAR701A is the prerequisite course for all 800 level CTE-Carpentry Technology courses

CAR801A – Framing Systems Level I 🝑

Framing Systems Level I is a project based course that introduces students to the fundamentals of framing within the Carpenter trade. Students will develop technical skills related to wall and floor framing and develop knowledge related to the effect forces have on, and how forces are transferred through structures. Students are expected to develop safe work habits, effective time/project management skills and work effectively with others.

CAR801A is the prerequisite courses for CAR801B - Framing Systems Level II

CAR801B – Framing Systems Level II

Framing Systems Level II builds on the technical skills introduced in the Framing Skills Level I course. Students are expected to perform framing tasks with an increased proficiency and be able to articulate why particular techniques are used in different situations. Students will explore the building envelope and understand its implications related to framing and structures. Students are expected to continue to develop safe work habits, effective time/project management skills and work effectively with others.

CAR801C – Carpentry Skills Level I

Carpentry Skills Level I is a project based course designed to introduce students to the wide range of carpentry and construction skills required when working within the carpentry trade. Students are expected to develop their technical skills related to the safe operation of common woodworking tools, technical drawings, and essential skills required within the Carpenter trade. Students are expected to develop safe work habits, effective time/project management skills and work effectively with others.

CAR801C is the prerequisite courses for CAR801D - Carpentry Skills Level II

CAR801D – Carpentry Skills Level II 🝑

Carpentry Skills Level II builds on the technical skills and knowledge introduced in the Level I course. Students are expected to perform construction and carpentry related projects/tasks with a high level of technical skills and be able to articulate why particular techniques are used in different situations. Students are expected to continue to develop safe work habits, effective time/project management skills and work effectively with others.

CAR801E – Carpentry Apprenticeship

Carpentry Apprenticeship is designed to provide students who are considering a future career related to the skilled trades an understanding of the skills and knowledge expected from an apprentice. The course will provide students an opportunity to explore the full range of topics expected from a level I Carpenter apprentice. Students will work on projects that support the continued development of their technical skills while becoming more articulate in their knowledge related to the carpentry trade.

Students wanting to challenge the Level I Apprenticeship Exam for Carpenter will require this course + a minimum of 4 other CTE-Carpentry courses. The student's average in all courses must be at or above 70% to qualify to challenge the Apprenticeship Exam.

Culinary

CUL801A – Culinary Skills A 🍑

CUL801A is a career and technical education course designed to explore careers in the culinary service industry. The student will develop an awareness of the essential knowledge, skills, positive attitude, and dedication needed to become a food service professional. Topics covered include salads and sandwiches, complex batter and doughs, pastas and grains, eggs and dairy, cultural influences, and preparation and execution of meal services.

CUL801A devotes a large portion of the learning to hands-on kitchen experiences. Students may be interested in CUL801A as a preparation for a career in food service, mastery of basic skills for related occupations, or as a foundation for post-secondary studies in this subject area.

Prerequisite: FDS421A

CUL801B – Culinary Skills B 📀

CUL801B is a career and technical education course designed to explore careers in the culinary service industry. The student will develop an awareness of the essential knowledge, skills, positive attitude, and dedication needed to become a food service professional. Topics covered include stocks, soups and sauces, baked goods, fruits and vegetables, fish, poultry and meats, cultural influences, and preparation and execution of meal services.

CUL801B devotes a large portion of the learning to hands-on kitchen experiences. Students may be interested in CUL801B as a preparation for a career in food service, mastery of basic skills for related occupations, or as a foundation for post-secondary education in this subject area.

Prerequisite: FDS421A

Design Technology

DES701A – Design Technology

Every manufactured product and building starts with a design concept and technical drawings. Design Technology will introduce the student to the technical design and problem solving process, practicing basic design principles, and analyzing how products are designed and built. Students will be introduced to technical drawing, the international language of industry, while developing sketching and mechanical drawing skills in orthographic and pictorial drawings. Computer assisted design and drafting (CADD) will also be incorporated to introduce students to computer assisted drawing techniques commonly used in industry. Throughout the course, students will be required to build a drawing portfolio as a display and record of the skills they have developed.

Design Technology appeals to a wide variety of students and will provide essential skills for any students considering a career in engineering, technologies, or skilled trades.

Foods and Nutrition

FDS421A – Foods and Nutrition

FDS421A will provide the student with an understanding of nutritional science and food preparation. The focus of the course is on personal and family wellness in relation to healthy eating, using Canada's Food Guide. Kitchen skills, meal planning, and food preparation will be developed through foods lab experiences. Students may be interested in Foods and Nutrition for personal development, as an introduction to post-secondary education, or for a career in food services.

New certification will be offered within the Foods 421 Curriculum to allow certification in Food Handler's Safety starting in 2022. Each student who completes the course and quiz will receive a certificate recognized in the food service industry on PEI. This certification has been approved in collaboration with the Department of Health and Wellness and the Department of Education and Lifelong Learning. The certificate's expiry date is 5 years from the date of completion. This course is designed to meet the National Guidelines of food safety; PEI Department of Health and Wellness, and the curriculum outcomes for Foods 421, Department of Education and Lifelong Learning.

Foods 421 is a recommended prerequisite course for all Culinary Skills courses.

Robotics

ROB801A – Robotics 🝑

Robotics is composed of technical learning opportunities as well as the scientific knowledge, skills, and technological/societal connections through an automated and radio-controlled robotics design context. This course extends the knowledge and skills in Applied Science (SCI701A) through the introduction of automation (computer programming) into the engineering design process along with a greater emphasis on synthesis through open-ended project based design challenges.

Prerequisite: Applied Science (SCI701A) or permission from the teacher (based on level of skill and knowledge)

Welding

WEL701A – Shielded Metal Arc Welding (SMAW) Level I

The SMAW Level I course is the entry level course to Welding Technology. Students will be introduced to tools, equipment, theories and practices that are common to the trade with a constant emphasis on safe work habits. Students will develop attention and concentration skills that will allow them to minimize the hazards associated with welding. The course will focus on the SMAW process to establish a basic foundation of welding skills. Students may also experience other welding processes as determined by the course projects.

This is a recommended prerequisite course for all other Welding Technology courses.

WEL801A – Shielded Metal Arc Welding (SMAW) Level II

Welders always strive to achieve a high standard of quality in their work. During this course, students will learn about the various types of weld joints and to select the proper electrodes for various SMAW tasks. Students will learn to diagnose and correct problems that arise when using SMAW equipment, identify and safely use power tools common to the trade, and develop the theoretical and practical skills required to perform high quality SMAW welds in all positions.

WEL801B – Gas Metal Arc Welding (GMAW) Level I 💽

Gas metal arc welding (GMAW) is extensively used in industry. During this course, students will learn to identify, describe, and safely use the equipment and tools required to perform GMAW welds. They will select the proper GMAW filler metals and shielding gases, and correctly identify and select proper weld joints required to complete projects.

This course is a prerequisite for WEL801C GMAW Level II.

WEL801C – Gas Metal Arc Welding (GMAW) Level II <equation-block>

The GMAW Level II course will focus on students building proficiency and accuracy within the skill of GMAW welding. Industry demands and sets a high standard for welders, and students are expected to develop the physical hand skills required to perform GMAW welds in all positions. This will include maintaining and adjusting equipment, power sources, and consumables to ensure quality welds.

WEL801D – Flux Core Arc Welding (FCAW)

Flux core arc welding is recognized as a high production process for welded fabrication projects. During this course, students will learn to select and safely use the correct FCAW equipment, shielding gases, and filler metals, and perform FCAW welds in all positions. They will also combine the GMAW and FCAW welding processes.

WEL801E – Gas Tungsten Arc Welding (GTAW)

Gas tungsten arc welding is a precise method of welding various types of metal. GTAW is a welding process widely used in the welding fabrication industry. During this course, students will learn to identify, describe, and safely use the equipment and tools required to perform GTAW welds in a variety of positions on various types of metal.

CAREER AND TECHNICAL EDUCATION EXPLORATORY COURSES

Schools are asked to adapt the course description below to suit the specific nature of the program within their school:

CTE701A – Career and Technical Education CTE801A – Career and Technical Education

CTE701A and CTE801A are intended to provide students an opportunity to explore technical occupations and/or skilled trade related careers. Students are expected to work safely, build problem solving skills, work collaboratively, think critically, and take responsibility for their own learning within the course. These courses should strive to integrate both the practical and theoretical components of the area of focus, providing time for students to practice the skills needed, acquire the knowledge base, and develop projects that require the active engagement of both the hands and the mind. Students are expected to think reflectively and critically of their work and be prepared to suggest ways in which their work/skills can improve.

COMMUNICATION AND INFORMATION TECHNOLOGY

CMM801A – Creative Multimedia

Creative Multimedia students will acquire basic web and multimedia production skills through practical experience with digital media technologies. The course will be activity-based, and taught from a design point-of-view. Creations will be presented in a portfolio format. Modules include Digital Design Principles, Digital Imaging, Animation, Audio/Video Editing, and Web Authoring.

This is an introductory level course and no prerequisites are required.

CMP521A – Introductory Computer Studies

The CMP521A provides students exposure to four big ideas of computer science: data analysis, prototyping, computer literacy, and programming skill development. The intended focus of study is the introduction of principles, methodologies and skills that will provide a successful foundation toward the understanding of how computer science can enable students to better understand the world they live, Through the application of a wide range of disciplines students will strive to complete meaningful work that builds resilience, confidence and competency within the discipline of computer science.

This is an introductory level course and no prerequisites are required.

CMP621A – Computer Studies

CMP621A is a continuation of the CMP521A course with special emphasis on the acquisition of problem solving, critical thinking, and independent learning skills. The syllabus of this course focuses on programming and dynamic website publishing/app programming. Students will be required, through major projects, to demonstrate the attainment of the specific curriculum outcomes of this course.

Good mathematical skills and the successful completion of the CMP521A course are highly recommended for students enrolling in this course.

ADC701A – Applied Digital Communication

ADC701A is designed to develop foundational skills and knowledge needed to use digital tools in a practice that is ethical, responsible, and reflective of the academic, social, and personal lives of students. Learners will have the opportunity to develop knowledge and enhance skills in keyboarding, word processing, visual presentations, spreadsheets, and coding. Learners will consume, curate, evaluate, create, and share digital content to express themselves and develop an awareness of their own digital wellbeing. Through practice and application learners will discover potential interests and pathways that connect to real-world issues and cultivate passion and purpose.

ITE801A – IT Essentials

The CISCO IT Essentials: PC Hardware and Software Networking Academy curriculum is used for this course. Students who complete this course will be able to describe the internal components of a computer, assemble a computer system, install an operating system, and troubleshoot using system tools and diagnostic software. Further topics include connecting to the Internet, sharing network resources, configuring wireless connectivity, maintaining laptops and portable devices, examining security, safety, and developing communication skills. Students participate in hands-on activities and lab-based learning to become familiar with various hardware and software components and discover best practices in

maintenance and safety. This curriculum aligns to the Comp TIA A+ Essentials industry certification, preparing students for entry level careers in field service technician, bench technician, help desk support, and computer sales representative occupations. Students who enroll in ITE801A are not expected to have any previous technical skills or knowledge.

IT Essentials is a required course for the Focus on Information Technology (FIT) certificate program. Advanced standing based on the successful completion of ITE801A, IT Essentials, will be granted to students who apply to the following Holland College programs: Computer Networking Technology or Computer Information Systems.

In addition to advanced standing, Holland College will provide transfer credit to students who successfully complete the ITE801A course with an overall average of 70%. Full transfer credit applies to the following Holland College courses: CMPH1000, CMPS1000, CIS1301, or CIS1306.

Early planning is required for a school to offer this course. Please contact the K-12 Learning Technology & Innovation Leader to discuss curriculum information, teacher training, and equipment requirements for this course.

ENGLISH LANGUAGE ARTS

The high school English Language Arts program provides flexibility and support to students as they work towards their goals for life after high school. Students will develop skills within the three strands of the English Language Arts Program: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. It is important to note that students are widely encouraged to take **academic** programming. If a student needs support in reaching their literacy goals, they may receive support in the **Bridging Program.**

Note:

- ENG671C English is equivalent to the former ENG631A English with respect to post-secondary entry requirements.
- Pathways are noted as examples; requirements for specific post-secondary programs or institutions should be considered when choosing and selecting courses.

Senior High Program of Studies and List of Authorized Materials 2022-2023

Note the grades 10-12 English Language Arts Bridging Program (English 471A/B, 471C, 571A/B, 571C, 671A, 671C) replaces the former general (English 431A, 531A and 631A) and practical (English 451A, 551A, and 651A) programming. Students who earn C level courses should have the literacy skills to be successful in the academic program. As a result, students may decide to transition from C level courses to academic (English 421A, 521A, and 621A) at any point in their high school years. The A/B program provides students the time and support to strengthen their literacy skills. Students may transition to C programming and then eventually to academic during their high school years. Students and teachers will co-construct pathways to graduation.

With the exception of English 671C, all other Bridging Program courses are Pass/Fail. Students demonstrate growth on a continuum within the Specific Curriculum Outcomes and their achievement is captured in a portfolio of learning. English 671C is assessed with a percentage grade and is equivalent to English 631A with respect to post-secondary requirements. English 671C students will be assigned a grade at the end of the semester based on their academic achievement in relation to the Specific Curriculum Outcomes. English 421A, 421B, 521A and 621A reflect the academic program. These courses will continue to be assessed with a percentage grade. Students should always refer to specific post-secondary institution requirements while planning their pathway to graduation.

English Core Courses

ENG421A - English

This integrated Language Arts course is designed to help students reach a high level of skill in all three strands of the English Language Arts Curriculum: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. This course is grounded in fundamental skills that support students as they prepare for the variety of pathways they may take after high school. This course will include a balanced literacy program with a variety of resources to engage students in meaningful activities that will support their development in the ten specific curriculum outcomes.

ENG421B – English (Pre-IB)

This integrated Language Arts course is designed to help students reach a high level of skill in all three strands of the English Language Arts Curriculum: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. This course is grounded in fundamental skills that support students as they prepare for the variety of pathways they may take after high school. This course will include a balanced literacy program with a variety of resources to engage students in meaningful activities that will support their development in the ten specific curriculum outcomes.

Learning experiences and opportunities in this course will support students considering entry into the International Baccalaureate Program.

ENG471A/B – English (Bridging Program)

This course will focus on essential literacy skills. Throughout the course, students will examine a range of strategies that will support them throughout the reading process. Students will apply these strategies before, during and after reading. Students will examine the purpose, structure and characteristics of text, and will also refine writing skills to construct a variety of texts. Speaking and listening is a foundational element of this course where students will demonstrate effective communication skills. Students will also examine oral texts.

Although this course will not be graded with a percentage, student achievement will be reflected on a

continuum of learning. This continuum will measure student achievement within the three strands of this course: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. Students will keep a portfolio of learning that will illustrate their growth in the Specific Curriculum Outcomes. Students and teachers will co-construct pathways to graduation. Successful students may choose to take a second 471 course or proceed to English 571. Students are encouraged to work towards English 671 C by graduation.

ENG471C – English (Bridging Program)

This course will focus on essential literacy skills. Throughout the course, students will examine a range of strategies that will support them throughout the reading process. Students will apply these strategies before, during and after reading. Students will evaluate purpose, structure and characteristics of text and will also refine writing skills to construct increasingly complex texts (narrative, expository, persuasive, and visual/multimedia). Speaking and listening is a foundational element of this course where students will demonstrate effective communication skills. Students will also evaluate a speaker's verbal and nonverbal language.

Although this course will not be graded with a percentage, students will be regularly evaluated on a continuum of learning. This continuum will measure student achievement within the three strands of this course: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. Successful students will demonstrate achievement of essential literacy skills. Students will keep a portfolio of learning that will illustrate their growth in the Specific Curriculum Outcomes. Students and teachers will co-construct pathways to graduation. Students may transition to the academic program or proceed to English 571C.

Please note: there are no prerequisites for English 471C.

ENG521A - English

Examines major genres such as drama, poetry, fiction, nonfiction and visual/multimedia. While recognizing the diverse community of learners, ENG 521A requires all students to apply previously attained knowledge and skills in new ways, thus leading them to higher levels of achievement and increasing their skills in Speaking and Listening, Reading and Viewing, Writing and Representing. ENG 421A, ENG 521A and ENG 621A are sequential courses. There may, however, be exceptional circumstances in which a student transfers into ENG 521A from another program.

ENG571A/B – English (Bridging Program)

This course is designed to support students working towards essential literacy skills. Students will continue to improve before, during and after reading strategies to evaluate increasingly complex texts. Students will write in a variety of forms while improving written communication. Students will also experience a range of learning opportunities in research and oral communication. Although this course will not be graded with a percentage, student achievement will be reflected on a continuum of learning. This continuum will measure student achievement within the three strands of this course: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. Students will keep a portfolio of learning that will illustrate their growth in the Specific Curriculum Outcomes. Students and teachers will co-construct pathways to graduation. Students choose to take a second 571 course or they may transition to English 671A or 671C.

ENG571C – English (Bridging Program)

This course is designed to support students in refining their literacy skills. Students will apply before, during and after reading strategies to evaluate increasingly complex texts. Students will also be expected to independently apply research skills and critique how identity and gender are portrayed in texts. Students will develop oral communication in formal and informal settings and write for a variety of purposes and audiences. Students will demonstrate their writing skills in a variety of genres (narrative, expository, persuasive, and visual/multimedia).

Although this course will not be graded with a percentage, student achievement will be reflected on a continuum of learning. This continuum will measure student achievement within the three strands of this course: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. Students will keep a portfolio of learning that will illustrate their growth in the Specific Curriculum Outcomes. Students and teachers will co-construct pathways to graduation. Students may transition to the academic program or proceed to English 671C.

ENG621A - English

This course is, for most students, the last high school English Language Arts prior to entering post-secondary studies. Therefore, in writing attention is given to argumentative texts; and in literature, the study of form becomes more important. The reading of various genres in earlier years is continued in this course. Research continues to be a major component with students applying the inquiry process, gathering sophisticated research to support their work. Furthermore, the process approach to writing is continued. ENG 421A, ENG 521A and ENG 621A are sequential courses. There may, however, be exceptional circumstances in which a student transfers into ENG 521A or ENG 621A from another program.

English 671A – English (Bridging Program)

This course is for students working towards essential literacy skills. Students will continue to explore a range of literary genres and writing forms while also increasing research skills and oral communication. Students will be exposed to a range of texts that explore gender, socioeconomic status and ideologies.

Although this course will not be graded with a percentage, student achievement will be reflected on a continuum of learning. This continuum will measure student achievement within the three strands of this course: Speaking and Listening, Reading and Viewing, and Writing and Other Ways of Representing. Students will keep a portfolio of learning that will illustrate their growth in the Specific Curriculum Outcomes. Students and teachers will co-construct pathways to graduation. While it is not required, students are encouraged to take English 671C prior to graduation.

English 671C – English (Bridging Program)

This course is, for most students, the last high school English Language Arts prior to entering the workforce or college studies. Students will continue to explore a range of literary genres and writing forms while also increasing research skills and oral communication. Students will be exposed to a range of texts that explore gender, socioeconomic status and ideologies. Successful students will demonstrate essential literacy skills and have the academic background to take on some college programs. While other Bridging Program courses are evaluated only with a continuum of learning, students in English 671 C will also receive a percentage grade.

English Electives

COM801A – Communications

This course is designed to help the student become proficient with the fundamental principles of communication in order to be successful in an ever-changing marketplace. Emphasis is placed on the six strands of the communication process: reading with comprehension, writing with clarity and purpose, speaking with confidence and precision, listening with sensitivity and perception, viewing with understanding, and representing as a means of exploration. In addition, students will acquire the technological skills needed for tomorrow's workplace which include word processing skills, advanced features of e-mail, and effective Internet searching.

This course will have entrance recognition at Holland College, with the curriculum designed to link to post- secondary opportunities in the studies of Office Systems Administration and Business Administration.

LSK551A – Life Skills English

This optional English course emphasizes the everyday applications of reading, writing, speaking, listening, and viewing skills. Students participate in activities and projects centered around evaluating television programs; simulating job interviews; obtaining and learning how to complete the various forms people use in job applications or in banking; practicing the reading, writing, and thinking skills needed for operating an automobile or maintaining an apartment; and learning oral communication skills for dealing with people in social settings such as hospitals, the courts, governments, and business. The study of literature, grammar, and mechanics is not emphasized in this course. However, appropriate language usage is stressed for the everyday applications which are the focus of study.

MED531A - Media

This optional English course provides for the study of four types of mass media: television, radio, newspapers, and magazines. Students learn the appropriate terminology to describe, discuss, and compare the main features of media. In addition, project work helps to develop an understanding of how media are used and produced. Besides the media themselves, advertising and the media is an important topic of the course. For each medium, the methods and impact of advertising are examined.

WRT421A – Writing

This course is designed to support students as they strive to meet the writing demands of academic-level high school courses and post-secondary study. Instruction is focused on the writing process (pre-writing, drafting, revising, editing, and publishing/sharing) and the research process (topic selection, researching, note taking, planning, writing, and documenting sources). Practical strategies are explicitly taught and modelled to support each stage of the above processes. Extended practice with these strategies prepares students to approach any writing task with added confidence and expertise.

Students will receive instruction on how to adapt their writing to suit a variety of audiences and purposes, employing a wide range of formats such as essays, paragraphs, e-mails, reports, personal journals, letters, and many others. The essential elements of clear and effective writing (ideas, organization, voice, word choice, sentence fluency, and conventions) are emphasized throughout.

WRT521A – Creative Writing

This course encourages students to develop creative ideas and express them through writing in a variety of forms and genres. The four major genres featured are poetry, short fiction, play writing, and nonfiction, although teachers may explore additional creative forms to accommodate student interest. Students will compile a portfolio of their writing.

Other regular features of the course include reading, peer and teacher conferencing, and journal writing. As they reflect on and discuss their own and others' writing, students will have the opportunity to develop and practice the behaviours of effective readers, speakers, and listeners. Regular mini-lessons on language conventions and usage will help students edit their own and others' work.

The purpose of WRT521A is to provide multiple opportunities, beyond those provided in the core English courses, for students to refine their writing skills through experiences in creative writing.

ENGLISH AS AN ADDITIONAL LANGUAGE

EAL771A – English as an Additional Language (Beginning/Introductory Level)

This beginning/introductory level course will be offered to students who already speak at least one other language, or who come from a home in which another language is used. This course will support students' development and progression of English language proficiency, which is required for success in school and the community. It will be highly recommended to students whose English language proficiency level in listening and speaking is assessed at the beginning/introductory level. This course intends to provide students with ample opportunities to listen and speak in English, while developing their English language fluency, accuracy, and comprehension. Although the four strands of language (listening, speaking, reading, and writing) are interrelated, the main emphasis of this course is on listening and speaking.

Students will be recommended to take EAL701B the same semester as EAL771A, where possible, as both courses complement one another. Students who have successfully met the outcomes in EAL771A and EAL701B will be highly recommended to take EAL701C.

EAL701A – English as an Additional Language (Beginning/Introductory Level)

This beginning/introductory level course will be offered to students who already speak at least one other language, or who come from a home in which another language is used. This course will support students' development and progression of English language proficiency, which is required for success in school and the community. It will be highly recommended to students whose English language proficiency level in listening and speaking is assessed at the beginning/introductory level. This course intends to provide students with ample opportunities to listen and speak in English, while developing their English language fluency, accuracy, and comprehension. Although the four strands of language (listening, speaking, reading, and writing) are interrelated, the main emphasis of this course is on listening and speaking.

Students will be recommended to take EAL701B the same semester as EAL701A, where possible, as both courses complement one another. Students who have successfully met the outcomes in EAL701A and EAL701B will be highly recommended to take EAL701C.

EAL701B – English as an Additional Language (Beginning/Introductory Level)

This beginning/introductory level course will be offered to students who already speak at least one other language, or who come from a home in which another language is used. This course will support students' development and progression of English language proficiency, which is required for success in school and in the community. It will be highly recommended to students whose English language proficiency level in reading and writing is assessed at the beginner/introductory level. This course intends to provide students with ample opportunities to read and write in English, while developing their reading and writing strategies, comprehension, response, and analysis. Although the four strands of language (listening, speaking, reading, and writing) are interrelated, the main emphasis of this course is on reading and writing.

Students will be recommended to take EAL701A the same semester as EAL701B where possible, as both courses complement one another. Students who have successfully met the outcomes in EAL701A and EAL701B will be highly recommended to take EAL701C.

EAL701C – English as an Additional Language (Intermediate Level)

This intermediate level course will be offered to students who already speak at least one other language, or who come from a home in which another language is used. This course will support students' further development and progression of English language proficiency, which is required for success in school and in the community. It will be highly recommended to students whose English language proficiency level in listening, speaking, reading, and writing is assessed at the intermediate level, or for those who have successfully completed EAL701A and EAL701B. This course provides students with ample opportunities to listen, speak, read, and write in English. The emphasis of this course is on the four interrelated strands: listening, speaking, reading, and writing.

It is recommended that students who successfully complete EAL701C will then take EAL701D to further progress in their English language proficiency.

EAL701D – English as an Additional Language (High/Intermediate/Advanced Level)

This high intermediate/advanced level course will be offered to students who already speak at least one other language, or who come from a home in which another language is used. This course will support students' further development and progression of English language proficiency, which is required for success in the school and in the community. It will be highly recommended to students whose English language proficiency level in listening, speaking, reading, and writing is assessed at the high-intermediate level, or for students who have successfully completed EAL701C. This course provides students with ample opportunities to listen, speak, read, and write in English. The emphasis of this course is on the four interrelated strands: listening, speaking, reading, and writing.

It will be highly recommended that students successfully complete EAL701D before taking ENG421A or ENG471A/B/C.

MATHEMATICS

The Prince Edward Island high school mathematics curriculum includes three pathways: Apprenticeship and Workplace Mathematics, Foundations of Mathematics, and Pre-Calculus. The topics covered within a pathway are meant to build upon previous knowledge and to progress from simple to more complex conceptual understandings. These pathways are illustrated in the following diagram:

High School Mathematics Pathways

The goals of all three pathways are to provide the prerequisite knowledge, skills, understandings, and attitudes for specific post-secondary programs or direct entry into the workforce. All three pathways provide students with specific mathematical understandings and critical-thinking skills. It is the choice of topics through which those understandings and skills are developed that varies among pathways. Each pathway is designed to provide students with the mathematical understandings, rigor, and critical thinking skills that have been identified for specific post-secondary programs of study or for direct entry into the workforce. When choosing a pathway, students should consider their interests, both current and future.

Apprenticeship and Workplace Mathematics

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into the majority of trades and for direct entry into the workforce. Topics include algebra, geometry, measurement, number, statistics, and probability.

Foundations of Mathematics

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that do not require the study of theoretical calculus. Topics include financial mathematics, geometry, measurement, algebra and number, logical reasoning, relations and functions, statistics, probability, and a mathematics research project.

Pre-Calculus

This pathway is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into post-secondary programs that require the study of theoretical calculus. Topics include algebra and number, measurement, relations and functions, trigonometry, combinatorics, and introductory calculus.

MAT421A – Foundations of Mathematics and Pre-Calculus 10

This is an introductory academic high school mathematics course which is a prerequisite for all other academic A and B mathematics courses. Included are such topics as measurement systems, surface area and volume, right triangle trigonometry, exponents and radicals, polynomials, linear relations and functions, linear equations and graphs, and solving systems of linear equations.

It is recommended that students in this course have a strong background in grade nine mathematics.

MAT421B – Foundations of Mathematics and Pre-Calculus 10 (Pre-IB)

This is an introductory academic high school mathematics course which is a prerequisite for all other academic A and B mathematics courses. Included are such topics as measurement systems, surface area and volume, right triangle trigonometry, exponents and radicals, polynomials, linear relations and functions, linear equations and graphs, and solving systems of linear equations.

Learning experiences and opportunities in this course will support students considering entry into the International Baccalaureate Programme.

MAT421K – Apprenticeship and Workplace Mathematics 10

MAT421K is an introductory high school mathematics course which demonstrates the importance of essential skills. MAT421K, combined with the grade eleven course (MAT521K) and a grade twelve course (MAT621K or MAT801A), will meet the requirements necessary to enter some community college programs. This course includes topics such as measurement, area, the Pythagorean Theorem, trigonometry, geometry, unit pricing and currency exchange, income, and basic algebra.

MAT451A – Practical Mathematics 10

This is an introductory high school mathematics course which emphasizes the basic math skills used in daily activities. Students learn about whole numbers, fractions, decimals, percents, ratios, proportions, graphs, measurements, geometry, and introductory algebra. Practical mathematics includes the building of calculator skills and estimating results, figuring out measurement, and calculating the cost of various items and materials.

MAT521A – Foundations of Mathematics 11

This is a second-level mathematics course which is designed to provide students with the mathematical understandings and critical-thinking skills identified for post-secondary studies in programs that do not require the study of theoretical calculus (Students are encouraged to examine the math program that is

required for their field(s) of interest in post-secondary). The topics covered are logical reasoning, angles and triangles, trigonometry, statistics and probability, systems of linear inequalities, quadratic functions, and proportional reasoning.

MAT421A is a prerequisite for this course.

MAT521B - Pre-Calculus 11

This is a second-level mathematics course which is designed to provide students with the mathematical understandings and critical-thinking skills identified for entry into post-secondary programs that require the study of theoretical calculus (Students are encouraged to examine the math program that is required for their field(s) of interest in post-secondary). The topics covered are sequences and series, trigonometry, quadratic functions, radical functions, rational functions, absolute value functions, systems of equations, and inequalities.

MAT421A is a prerequisite for this course. As well, it is recommended that students have a strong background in MAT421A, especially in the areas of radicals and factoring of polynomials.

MAT521E - Pre-Calculus Elective

This course, although optional, is highly recommended for students in the pre-calculus pathway. The topics covered are logical reasoning, geometry, statistics, probability, and financial mathematics.

MAT521E is intended for students in the Pre-Calculus pathway only.

MAT521K – Apprenticeship and Workplace Mathematics 11

MAT521K continues the exploration of how essential skills are used in the workplace and in everyday life. MAT521K, combined with a Grade 12 mathematics course (MAT621K or MAT801A) will meet the requirements to enter some community college programs. This course includes topics such as surface area and volume, trigonometry, scale diagrams, compound interest, financial mathematics, slope, proportional reasoning, and statistics.

MAT551A – Practical Mathematics 11

This course emphasizes the concepts and skills associated with comprehending and using mathematics on a day-to- day basis. Included are the mathematics associated with utility bills, food buying and preparation, transportation, mortgages and loans, credit buying, and insurance. In addition, the course includes interpreting charts, tables, graphs, rate schedules, scale drawings, and statistical information.

MAT611B - Calculus

This is an introductory calculus course which is intended for students planning to enroll in post-secondary programs that require the study of calculus, such as engineering or most science programs. It introduces students to topics such as limits and continuity, derivatives and their applications, and integrals and their applications.

MAT621B is a prerequisite for this course. As well, it is recommended that students have a strong background in MAT621B.

MAT621A – Foundations of Mathematics 12

This is a third level mathematics course which is intended for students planning to enroll in post-

secondary programs that do not require the study of calculus (Students are encouraged to examine the math program that is required for their field(s) of interest in post-secondary). It introduces students to topics such as financial mathematics; logical reasoning; probability; combinatorics; functions; and polynomial, exponential, logarithmic, and trigonometric functions.

MAT521A or MAT 521B are prerequisites for this course.

MAT621B – Pre-Calculus 12

This is a third level mathematics course which is intended for students planning to enroll in post-secondary programs that require the study of calculus (Students are encouraged to examine the math program that is required for their field(s) of interest in post-secondary). It introduces students to topics such as transformations, functions, trigonometry, exponential functions, logarithmic functions, function operations, and combinatorics.

MAT521B is a prerequisite for this course.

MAT621K – Apprenticeship and Workplace Mathematics 12

MAT621K will meet the requirements to enter some community college programs. MAT621K includes topics in measurement and probability, working with data, linear relationships, owning and leasing a vehicle, properties of geometric figures, transformations, and trigonometry.

MAT521K or MAT521A is a prerequisite for this course.

MAT651A – Practical Mathematics 12

This course is intended for students who might benefit from a program that emphasizes problem solving. The content includes problems involving income; banking; credit; transportation; housing; taxes; insurance; investments; and renting, purchasing, and budgeting.

MAT801A – Applied Mathematics

This course emphasizes essential mathematical skills that are used in various trades-related careers. Students are involved with a variety of hands-on activities directly related to mathematics and trades-related courses. MAT801A will meet the requirements for some community college programs. The units of study include mathematical essentials, construction/housing, electrical, spatial sense, and fabrication.

PHYSICAL & HEALTH EDUCATION

LED621A – Leadership (Formally PED621 – Physical Education Leadership)

This course will enable students to personally develop their leadership attributes, skills, and styles needed to create, plan, lead, and safely implement projects that will enhance the well-being of self and others. By building on a foundation of leadership concepts and theories, students will have many opportunities to apply their learning to develop effective communication strategies, group dynamics, and teamwork skills, and become more socially and personally responsible for their actions. Students will extend their leadership abilities and discover service learning opportunities to model effective leadership both within and beyond the classroom. This course will allow students to take pride in their learning by presenting evidence of their personal leadership and how this growth will benefit them in all areas of their lives.

PED401A – Physical Education (Wellness)

The purpose of PED401A (Wellness) is to develop confident and competent students who understand, appreciate, and engage in a balanced, healthy, and active lifestyle. This curriculum contributes to fostering optimal wellness while recognizing there are many factors that promote well-being at every stage in a young person's development. Throughout PED401A, opportunities are provided for students to attain and maintain a healthy mind, body, and spirit. Young people can acquire the understandings, skills, and confidence needed, for example, to create a personal plan for wellness, balance the dimensions of wellness, establish a norm of safety, experience how body mass affects physical fitness, and develop a deep sense of the spiritual dimension of overall well-being.

This course will broaden, extend, and reach beyond traditional ideas of fitness and health. It is a way of doing and is a compliment and extension of learning from the K-9 physical education curriculum. This curriculum is committed to and appreciates what students do, think, feel, and believe about their wellness. It is a positive, active approach to living and will enhance the quality of life we should enjoy when the physical, psychological, spiritual, social, and environmental dimensions in our lives are balanced. No dimension should be neglected or overemphasized.

PED801A – Physical Education (Physical Literacy)

This course represents a unique journey for each student, can be enjoyed through a range of movement activities and environments, and contributes to the present and future development of their whole self.

The learning outcomes of this course are inclusive to all students and will provide opportunities for them to explore and elevate their physical literacy by developing essential and interconnected elements whose importance may change throughout life:

- Motivation and confidence
- Physical competence
- Knowledge and understanding
- Engagement in movement activities for life

Physical literacy is an elective course credit for students in their second or third year of senior high school. This course is sequential with PED401A and is intended to promote the value of physical literacy and physical activities for life.

RESOURCE

RES401A - Resource

A number of students enter high school in grade ten with needs that cannot be addressed adequately through traditional courses. Some of these students may have received resource support during their intermediate grades and may need some level of continued support. A resource credit could provide schools that have resource programs flexibility to respond to the needs of these students. A strong link between subject teachers and the resource teacher is required to provide the necessary academic support to the student.

The goals of this course include:

- developing skills in communication, time management, organization, research, and study skills;
- exploring the relevance and potential career options resulting from the skills listed above;
- developing an awareness by the student of his/her personal learning style and academic strength;
- identifying and remediating learning difficulties and strengthening areas of academic concern;
- allowing students to experience success.

Course Entrance Criteria

No student may select to take a resource credit. Students must be referred/recommended by the school services team, the students' teachers, and school administrators.

Students and parents must be informed about the credit as well as the goals/outcomes established at the beginning of the course and agree to participate.

This credit is not available to students with an I.E.P. who are eligible for a special education credit.

Credit Information

Students will receive 110 hours of instruction including time spent in class (normally a maximum of onethird of a semester) prior to the beginning of the resource course.

A student may not receive a resource credit and another subject credit for same time block of study. The teacher will develop an individualized course plan for the student in consultation with the Student Services Team and the student at the beginning of the course. This plan must include student outcomes and the teaching and learning strategies for achieving such outcomes, as well as assessment strategies to be used.

A student may receive up to one resource credit per year for a maximum of three credits. A teacher will place a copy of the plan and the progress achieved by the student in the student's record file.

RES501A/601A – Resource

Outcomes are a continuation of those started in RES401A. More emphasis should be placed on exploring career options and on the acquisition of workplace related skills. The entrance criteria and goals/outcomes for RES501A and RES601A are based on those already identified in the RES401A course outlined above.

SCIENCE

AGR621A - Animal Science

This course is designed to develop an appreciation and awareness of the livestock and poultry industries in Canada and PEI, careers directly and indirectly related to agriculture, and issues on food safety and animal welfare.

The major topics include:

- An Overview of Animal Science;
- Animal Care and Management;
- Animal Nutrition;
- Genetics and Reproduction.

AGR621A requires students to follow a guided inquiry process that will result in an investigation and presentation of an animal care and management issue.

Students who take AGR621A Animal Science may not take AGR801A Animal Science.

AGR801A – Animal Science

This course is designed to develop an appreciation and awareness of the livestock and poultry industries in Canada and PEI, careers directly and indirectly related to agriculture, and issues on food safety and animal welfare.

The major topics include:

- An Overview of Animal Science;
- Animal Care and Management;
- Animal Nutrition;
- Genetics and Reproduction.

Some course content is flexible to allow teachers and students to take advantage of selecting animals or areas of special interest.

Students who take AGR801A Animal Science may not take AGR621A Animal Science.

AGS621A – Agriscience

This course seeks to promote an appreciation and understanding of the scientific principles and technology applied to the study of agriculture.

The major topics include:

- An Overview of Agriscience;
- Crop Production;
- Green Spacing;
- Plant Biology;
- Soil and Water Management.

AGS621A requires students to follow a guided inquiry process that will result in an investigation and presentation of a crop production issue.

Students who take AGS621A Agriscience may not take AGS801A Agriscience.

AGS801A – Agriscience

This course seeks to promote an appreciation and understanding of the scientific principles and technology applied to the study of agriculture.

The major topics include:

- An Overview of Agriscience;
- Crop Production;
- Green Spacing;
- Plant Biology;
- Soil and Water Management.

Some course content is flexible to allow teachers and students to take advantage of selecting crops or areas of special interest.

Students who take AGS801A Agriscience may not take AGS621A Agriscience.

BIO521A – Biology

Biology 521A provides an opportunity for students to develop scientific literacy through a holistic examination of how human systems work independently and interdependently to maintain homeostasis - an optimum equilibrium state of function. Topics/Systems studied in this course include:

- Macromolecules;
- Cell Transport;
- Cellular Respiration/Photosynthesis
- Circulatory System;
- Respiratory System;
- Digestive System;
- Excretory System;
- Immune System;
- Nervous System;
- Endocrine System; and
- Diseases/Disorders.

These topics, along with procedural knowledge, provide the content and skill framework that will be used to engage students with the processes of scientific literacy (inquiry, problem solving, decision making) and continued development of the essential graduation competencies.

BIO621A – Biology

This is the second science course in which the focus is entirely on the life sciences. BIO621A builds upon, in part, the knowledge and skills obtained from BIO521A and will provide students with the opportunity to increase their scientific literacy by continuing to develop foundational knowledge and skills as well as the opportunity to make connections between the life sciences, technology, society, and

the environment.

The units of study include:

- Evolution, Change, and Diversity;
- Genetic Continuity;
- Maintaining Dynamic Equilibrium II (Systems: Nervous, Endocrine);
- Reproduction and Development.

BIO801A – Human Biology

This course is designed to introduce students to the structure, function, and interrelation of the various systems in the human body that are required to maintain homeostasis.

The units of study include:

Blood and Immunity;
 Endocrine System;
 Nutrition;

Circulatory System;
 Digestive System;
 Embryonic Development;
 Genetics;
 Homeostasis;
 Respiratory System;
 Skeletal System.

Excretory System;Nervous System;

BIO801A will provide students with the opportunity to develop knowledge, skills, and the science-technology- society-environment connections concerning the functioning of their body.

CHM521A – Chemistry

CHM521A provides an opportunity for students to develop scientific literacy through the study of the following topics:

- Structure and Properties of Chemicals and Chemical Bonds;
- Stoichiometry;
- Organic Chemistry; and
- The Nature of Science as it relates to Atomic Theory.

These topics, along with procedural knowledge, provide the content and skill framework that will be used to engage students with the processes of scientific literacy (inquiry, problem solving, decision making) and continued development of the essential graduation competencies. Chemistry 521A forms the foundation required for the future study of chemistry.

CHM621A – Chemistry

CHM621A provides an opportunity for students to develop scientific literacy through the study of the following topics:

- Thermochemistry;
- Solutions, Kinetics and Equilibrium;
- Acids and Bases; and
- Electrochemistry.

These topics, along with procedural knowledge, provide the content and skill framework that will be used to engage students with the processes of scientific literacy, (inquiry, problem solving, decision making), and continued development of the essential graduation competencies. Chemistry 621A is a university preparatory course that builds on the foundational learnings developed in Chemistry 521A.

Prerequisite: CHM521A

ENV621A – Environmental Science

ENV621A seeks to promote an appreciation and understanding of the environment and sustainable development.

Some topics will include:

- Ecological Principles;
- Environmental Challenges and Successes;
- Ethics:
- Human Population and Carrying Capacity;
- Natural Resources;
- Sustainability:
- World Views.

Some course content is flexible to allow teachers and students to take advantage of selecting local topics or areas of special interest. A portion of the course is dedicated to project-based learning where critical thinking, problem- solving, and decision-making skills will be developed in the process of examining and analysing environmental issues. With guidance and teacher-directed models, students will learn to follow a scientific inquiry process within their own investigations of environmental issues.

Prerequisite: SCI421A

OCN621A – Oceanography

OCN621A is an integrated science course that examines the geological, chemical, physical, and biological aspects of the marine environment. Students will be made aware of regional, national, and global oceanrelated issues.

PHY521A – Physics

This is the first science course in which the focus is entirely on the attitudes, skills, knowledge, and STSE connections involving physics. PHY521A provides the quantitative and theoretical foundation for the units of study in PHY621A by introducing wave motion and examining, in one-dimension, the topics of kinematics, dynamics, and momentum.

The units of study include:

- Kinematics (study and description of motion);
- Dynamics (study of forces that explain motion);
- Momentum and Energy;
- Waves.

PHY621A - Physics

This is the second course in which the focus is entirely on the attitudes, skills, knowledge, and STSE connections involving physics. PHY521A provides the foundation for the units of study in PHY621A. Topics related to kinematics, dynamics, and energy in PHY621A will include two-dimensional analysis.

The units of study include:

- Application of Vectors;
- Circular and Planetary Motion;
- Electricity and Magnetism.

Prerequisite: PHY521A

SCI421A - Science

Science 421A is designed to shift the focus away from a primary emphasis upon science topics or content, towards scientific literacy as defined by the four identified foundations: **Nature of Science, Procedural Knowledge, Content Knowledge, and Decisions and Perspectives**. Content remains an integral part of this course but is viewed as the context through which "science" is learned.

The three topics identified as context for Science 421 include:

- Cells and Infectious Disease (life science);
- Real World Chemical Reactions, (physical science –chemistry); and
- Designing Mechanical Systems (physical science –physics).

SCI421B – Science (Pre-IB)

Science 421A is designed to shift the focus away from a primary emphasis upon science topics or content, towards scientific literacy as defined by the four identified foundations: **Nature of Science, Procedural Knowledge, Content Knowledge, and Decisions and Perspectives**. Content remains an integral part of this course but is viewed as the context through which "science" is learned.

The three topics identified as context for Science 421 include:

- Cells and Infectious Disease (life science);
- Real World Chemical Reactions, (physical science –chemistry); and
- Designing Mechanical Systems (physical science –physics).

Learning experiences and opportunities in this course will support students continuing on to the International Baccalaureate Programme.

SCI431A - Science

This course introduces students to concepts that are relevant in today's world. It encourages students to become interested and inquisitive in a variety of scientific topics.

The course is divided into four units:

- Chemical Reactions;
- Ecosystems;
- Physics;
- Weather Systems.

Lab and field activities will complement the curriculum.

SCI701A – Applied Science

SCI701A is a physical science course that provides an opportunity for students to develop scientific literacy through the use of technology and a robotics design and construction context. It contains a balance of theory, design, and experimental activities. Topics studied in this course include:

- Robot Subsystems;
- Radio Controlled Robot Design and Assembly;
- Speed (rotational, translational), Torque and Gear Ratios; and

| | Mechanical Systems (traction, manipulator, rotating joints, linkages) Research Project (STEAM product development and application). |
|----------|---|
| In a col | laborative environment, this course will provide opportunities for those students interested in related to applied technology, engineering, and the skilled trades. |

SOCIAL SCIENCES AND HUMANITIES

CLO521A – Clothing

This course is designed to create an interest in all aspects of clothing, including fabrics, fibers, construction, and wardrobe planning. Students will learn to use and care for a sewing machine and other sewing equipment, to select and use commercial patterns, and to select and prepare fabric for clothing construction. Students will be required to construct sufficient sewing projects to practice such techniques as waistbands, collars, sleeves and cuffs, zippers and buttonholes, pockets, hems, and pressing techniques. In addition to these skills, students should also have the knowledge to help them make wise clothing related choices in the marketplace, and to maintain and care for their own clothing.

FAM421A - Family Life Education

This personal development curriculum has themes on relationships, human sexuality, and healthful living. It is intended to help students know and appreciate themselves; develop a variety of skills, attitudes, and behaviours that promote successful relationships; assume responsibility for personal health and wellbeing; and enhance the central roles played by work and family in daily life. Its main focus is on adolescence. This course is designed to be participatory with emphasis upon effective communicating and decision-making.

FAM621A – Family Life

Unit topics included are: Family as a Basic Unit, Choosing a Partner, Getting Married, The Marriage Relationship, Facing Family Challenges, Transition to Parenthood, Late Adulthood, and the Nature of Marriage and the Family.

HOS801A - Hospitality and Tourism

This course is designed to make students aware of the scope and relative importance of this industry to the people and economy of Prince Edward Island. Through interactive experiences with the industry, students will work on activities and projects which will help them to be familiar with the various sectors of the industry such as accommodations, travel trade, food and beverage, recreations, events and conferences, attractions, tourism services, and transportation.

Students will become aware of their employability skills through class discussions and project work. Students may receive training in an internationally recognized customer-service training program called PEI Best Service Excellence Certificate.

This course will have entrance recognition at Holland College with the curriculum designed to link to post- secondary opportunities in the study of Tourism and Hospitality.

HSG621A – Housing

This course is a study of all aspects of housing as it affects the consumer. Major concepts include factors influencing space needs and choices of housing (stages of family cycle, economic and social situation), types of architectural forms and styles (forms, multiple housing, styles), financial aspects of housing (buy, rent, build/renovate, sources of money, terms connected with buying, insurance), choosing a site (problems of location, rural versus urban, zoning, lot, size, shape/location, exposure, taxes, landscaping), structure of the housing, factors to consider in a floor plan/layout, interiors (principles/elements of design), selection and arrangement of furniture (periods and styles, traditional, contemporary, arrangement), development of architecture, and careers in housing.

SOCIAL STUDIES

CAS401A – Canadian Studies

CAS401A is designed to meet the needs of students with a wide range of abilities and interests, and will engage students in a broad overview of contemporary factors that form and continue to influence our identity as a country. Historical legacies will used to support these understandings. Areas of study include geography, history, economics, culture, and citizenship. Interdependence is a persistent theme in our global world and will extend grade nine Atlantic interdependence to a broader Canadian context.

ECO621A - Introductory Economics

The major areas of study within this course include fundamental economic theories, microeconomics, macroeconomics, and global economic concepts. Students will also move through the inquiry process by exploring an economics topic that is of interest to them. The overall objective of the course is to provide students with the knowledge and skills needed to understand economic concepts and issues, and to prepare them for effective decision-making, responsible citizenship, and critical analysis. Economic issues are rooted in social, political, and environmental problems that require a great deal of attention and have important consequences. It is therefore vital that senior high school students have the opportunity to understand the fundamental principles and concepts of this subject matter, as well as develop and acquire economic literacy so they can respond to the challenges of our modern society.

The Department of Education and Lifelong Learning and Holland College recognize Introductory Economics (ECO621A), as a dual credit course. In the simplest of terms, dual credit refers to a course where high school students earn both high school and post-secondary credits concurrently for the same course. Therefore, all students who have successfully completed ECO621A, and have achieved a grade of 60% or greater, will be exempt from taking the equivalent course at Holland College (BUSI 2030). BUSI 2030 is found as either an elective or a core course in the following Holland College programs:

- Business Administration;
- Accounting Technology;
- Marketing and Advertising Management;
- Sport and Leisure Management.

GEO421A – Geography of Canada

This course explores Canada's distinct and changing character, and the geographic systems and relationships that shape it. Students will investigate the interactions of natural and human systems within Canada, as well as Canada's economic, cultural, and environmental connections to other countries. Students will use a variety of geographic tools and technologies, inquiry, and communication methods to analyse and evaluate geographic issues, and to present their findings.

GEO521A – Global Studies

This course investigates the study of geography, its methods and tools, and the application of geographic inquiry practices in making sense of the world around us. Students will explore patterns that exist in the natural world, linking land, oceans, natural resources, climate, and human activity. Because of the inherent interplay between people and place, current issues are an integral part of the Global Studies course although the emphasis is on physical geography concepts. The course is organized into three units: Geographic Methods, Physical Patterns of the World, and Cultural Patterns of the World. A Global Classroom Initiative component of the course provides a unique PEI-Kenya link supporting the cultural unit of the course.

GEO531A – World Geography

This course investigates the study of geography, its method and tools, and the application of geographic inquiry in making sense of the world around us. With guidance and teacher-directed inquiry models and investigations, students will develop inquiry and literacy skills while studying world geography. Students will explore patterns that exist in the natural world that link land, oceans, natural resources, climates, and human activity. Current issues will be an integral part of the World Geography course, although the emphasis will remain on physical geography concepts. Students will engage in a geographic inquiry that may also form the basis of their active citizenship project. The course is organized into three units: Geographic Methods, Physical Patterns of the World, and Cultural Patterns of the World.

GEO621A – Global Issues

This course is designed as an inquiry-based study of world issues. Students will begin the course by exploring the concept of "global issue" and the reasons why society becomes actively involved in global issues. Course content is flexible to allow teachers and students to take advantage of selecting timely topics or areas of special interest.

With guidance and teacher-directed models, students will learn to follow an inquiry process within their own investigations of global issues, thereby developing academic research and literacy skills that will be applicable in many areas of study. A final component of the course requires students to participate in an active citizenship role where they will plan and carry-out an action plan to bring about positive change related to a current issue, either local or global. Assessment of this course will be mainly processoriented due to the emphasis on skill-building.

Final research products will be evaluated for quality of content as well as process.

GEO631A – Global Issues

The focus of this course is inquiry into contemporary global issues that may be political, geographic, economic, environmental, or cultural in nature. With guidance and teacher-directed inquiry models and investigations, students will develop inquiry and literacy skills while studying various topics of global concern. Course content is flexible in order to allow teachers and students to take advantage of selecting timely topics or areas of special interest. Knowledge and skill-building will be achieved through the use of multiple resources, both print and non-print. Students will engage in an inquiry project based upon a selected global issue which may become the basis for their active citizenship project. Assessment will be balanced between content knowledge and inquiry process skills.

HIS421A – Ancient and Medieval History

This survey course in ancient and medieval history traces the evolution and the principal events in human history. Emphasis will be placed on relating historical events and legacies to the present. Students will be introduced briefly to the periods of pre-history before focusing more intently on ages and eras beginning with the Paleolithic Age (Stone Age). The course follows a chronological path exploring the ancient civilizations of Mesopotamia and Egypt; the cultural achievements of the Greeks and the Romans; the rise of Christianity, Islam, and other religions; and the Feudal System.

HIS521A – 20th Century World History

History 521A is a contemporary study of the 20th Century with emphasis on conflict and the lessons learned from significant world events. The course provides students with a broad comparative analysis of many countries' responses to the forces, events and personalities of the 20th Century. The focus will be on the impact of historical events and legacies of the early modern world on present-day society. A chronological survey of topics will include the Industrial Age and Imperialism, World War One and World War Two, The Cold War, the counterculture of the 1960's, conflict in the Middle East, the emergence of global superpowers, and changing global patterns in the 21st Century. There will be a significant focus of instruction and assessment on outcomes relative to the world wars and the Cold War era. Students of HIS 521A will demonstrate their capacity to interpret evidence, assess and defend positions, conduct inquiry related to our course topics.

HIS621A – Canadian History

This course was developed specifically to represent an Atlantic Canadian perspective within our national context. The course is organized into thematic units which address persistent questions in Canada's development as a nation. These questions form the basis for five of the six units in the course: Globalization, Development, Sovereignty, Governance, and Justice. The sixth unit, Independent Study, engages students in a specific piece of historical research. The course emphasizes the importance of student inquiry and research using historiography and the historical method in the examination of Canada's history. Key topics studied through these approaches include, but are not limited to, First Nations, Colonialism, Confederation, World Wars, Free Trade, Constitutional Issues, Canada's Role in the Global Community, Industrialization, Human Rights Issues, and Immigration/Migration.

HIS621B − PEI History

A central focus of this course is the question, "What does it mean to be an Islander?" Using multiple sources and current concepts of inquiry and learning, students will investigate the social, cultural, political, and economic development of PEI from its earliest records of settlement to the present. Students will study various historical themes and issues through a range of time periods to learn about Prince Edward Island's place in the world as a small island with its own unique story. Students will be challenged to deliberate on current Island issues and to recognize how history sometimes repeats itself in cases such as out-migration, economic development, and land issues. A major objective of the course is for students to utilize community resources, histories, and people as a basis for their own inquiry into a particular topic of Island history.

LAW521A – Introductory Law

This course is an introduction to Canadian law with an exploration of fundamental concepts such as the purpose of law, development of law, and administration of law in Canada. The course is organized into units that include Foundations of Law, Criminal Law, and Civil Law. Another unit, based upon an inquiry approach, provides an opportunity for students to further explore specific areas of interest that are not included in the core units such as Family Law, Contractual Law, Aboriginal Law, Media and Internet Law, and other areas of interest.

*

LAW531A – Introductory Law

This course is similar to LAW521A in that it provides an introduction to many of the same concepts. Students will be able to gain an understanding of Canadian law through the use of case studies and explorations of legal issues. The course is organized into three units: Foundations of Law, Criminal Law, and Civil Law. The Civil Law unit also includes a section on Family Law. Topics of study include fundamentals of law, the Charter of Rights and Freedoms, criminal and civil law procedures, youth and

law, sentencing, and remedies and defenses, among other areas of interest.

MUH801A - History of Rock and Roll

This course will introduce students to a study of popular music from the 1950s to the 1970s. Students' learning will center around the following: an examination of music in our lives, including its roles, genres, social context, and ways that it is experienced; distinguishing between listening and hearing (active and passive listening); and developing an understanding of terms and concepts associated with the elements of music that enable students to consider and discuss what they listen to, using the language of music.

POL621A – Advanced Political Studies

This course is divided into two parts, Canada's political system and an overview of the world's major political systems.

Topics covered under Canada's political system include the role of government, the electoral process, the role of political parties, the Constitution, Parliament, federal, provincial, and municipal governments, the Charter of Rights and Freedoms, and other political concepts such as civil protest.

This course also seeks to broaden students' views of the world's major political systems. Students will explore the values behind democratic and non-democratic forms of governments as they will be challenged to analyse world problems through different viewpoints. The course promotes critical thinking and decision-making skills, and encourages discussion and debate on current political events.

SOC451A - Social Studies

This course has been designed to meet the needs of Grade 10 students who may otherwise have difficulty with academic or general courses. The program content is drawn from a number of social science disciplines with an emphasis on Canadian-based topics and materials. Current issues, citizenship topics, and the legal system are examined as well as other selected themes in Canadian history and geography.

SOC851A - Social Studies

This course is an overview of the geography, history, and society of Canada in a North American and world context. It is designed to complement and continue the study undertaken in SOC451A.

French Programs – Course Descriptions

CORE FRENCH

The Senior High Core French Program is taught using a literacy approach, and also reflects the influence of the Neurolinguistic Approach to second language teaching and the Common European Framework of Reference for Languages. Students are actively involved in communicative tasks targeting the development of all four communication skills – listening, speaking, reading, and writing – which allow for meaningful, authentic communication to occur in French. These language skills are part of a continuum of communication abilities and developed through an action-oriented approach.

Since French is the working language of the classroom, a variety of teaching strategies, including extensive small-group work, are necessary to ensure maximum student interaction and collaboration. Comprehension, interaction, and production skills are developed through purposeful, action-oriented tasks set in a variety of authentic contexts, which mirror those faced by students in their daily lives.

At the end of Grade 12, students who have successfully completed FR621A have the opportunity to write the DELF exam (Diplôme d'études en langue française), an internationally recognized certification that assesses students' four communication competencies in French (speaking, listening, reading, and writing). Students may elect to be evaluated at either the B1 or B2 level. The results obtained on the DELF exam have no impact on a student's final mark in their high school French courses. However, obtaining certification through the DELF has the potential to open many possibilities for the student and it is therefore highly encouraged.

FRE421A - French

FR421A is composed of function-driven, action-oriented language activities that are engaging, relevant, and individualized. Students learn communicative language skills within contexts linked to real-life experiences and French is the working language of the classroom. For each unit studied, the student will be responsible for choosing a project or task to demonstrate their learning, and all work in that unit will contribute to the achievement of that goal. Evaluation of oral production and comprehension, reading comprehension and written production is on a continuum based on the Common European Framework of Reference.

FRE521A – French

FRE521A is taught using a literacy approach, and also reflects the influence of the action-oriented approach presented in the Common European Framework of Reference for Languages. The program focuses on the development of all four communication skills – listening, speaking, reading, and writing – in French, with particular emphasis on spoken interaction. As well, the program contributes significantly to the general education of the learner. The program is organized around modules that reflect the interests and experiences of senior high students. Throughout each module, students are actively involved in a variety of activities and tasks that are authentic and pertinent to the learner and to the world beyond the classroom.

Prerequisite: FRE421A or permission from course teacher

FRE521G - French Communication and Culture

The content and skill requirements of this course are met through participation in the PEI-Québec Exchange program. Building on foundational communication skills which are solidified in FRE421F, or basic communication skills acquired in FRE421A, this course incorporates metacognition and self-evaluation, as strategies to increase ease of communication with increasingly complex, abstract and/or unfamiliar contexts through an immersion experience. The context of the exchange provides an additional challenge with an unfamiliar, authentic francophone environment. It also provides meaningful opportunities for students to develop 21st century transdisciplinary skills and experience intense personal development. In order to register for this course, students must apply to the exchange program in accordance with associated deadlines and requirements, and if selected, must agree to terms of participation. Interested students should consult a teacher/counselor for course planning purposes. For more information, please contact the program coordinator.

Prerequisite: FRE421F (immersion students only), FRE421A (core French students only)

FRE621A – French

FRE621A is a continuation of the FRE521A program but with different themes which include *Ma première voiture*, *Agir pour la terre*, and *Que faire après le secondaire*. These themes are designed to move the student towards a B1, or independent user, level of the Common European Framework of Reference.

At the end of Grade 12, students who have successfully completed FRE621A have the opportunity to write the DELF exam (Diplôme d'études en langue française), an internationally recognized certification that assesses students' four communication competencies in French (speaking, listening, reading, and writing). Students may elect to be evaluated at either the A2, B1 or B2 level. The results obtained on the DELF exam have no impact on a student's final mark in their high school French courses. However, obtaining certification through the DELF has the potential to open many possibilities for the student and it is therefore highly encouraged.

Prerequisite: FRE521A or permission from course teacher

FRENCH IMMERSION

The French immersion program at the senior high level has been planned to accommodate students coming from early, middle, and late French immersion programs. In addition to the French language courses offered at each level, six social studies courses, one career course, one science course, and one math course are available and offered at the discretion of individual schools or through distance education.

The major objectives of the French immersion program are:

- To enable students to pursue a bilingual education.
- To enable students to interact confidently in an authentic French environment;
- To enable students to live in French in their chosen environment and community;
- To develop skills for employment in which the working language is French;
- To encourage students to value and respect cultural diversity;
- To encourage students to be proud of their bilingualism;
- To build students' confidence.

Program Description

French immersion students are subject to the same graduation requirements as their peers in the English language program.

A French immersion certificate is offered by the Department students who have successfully completed the program requirements at the end of Grade 12. In order to receive the certificate, they require 6 French credits within the graduation parameters. There are two language courses available in grade 11, FRE521F and FRE521G; students may take either or both. Either course may be used as a pre-requisite for FRE621F. Both courses may be used toward the 6 credits required for the French Immersion Certificate.

Course offerings vary in each school according to enrolment and availability, but in most cases, students satisfy the 6-credit requirement by enrolling in one French language course at each level and one French social studies course at each level. Various extracurricular electives are offered in many schools in order to further support French language development.

At the end of Grade 12, students who have successfully completed at least 1 grade 12 French course have the opportunity to write the DELF exam (Diplome d'études en langue française), an internationally recognized certification that assesses students' four communication competencies in French (speaking, listening, reading, and writing). Students may elect to be evaluated at either the B1 or B2 level. The results obtained on the DELF exam have no impact on student's final mark in their high school French courses. However, obtaining certification through the DELF has the potential to open many possibilities for the student and it is therefore highly encouraged.

French Language Arts

The French language arts courses in Grades 10, 11, and 12 aim to foster the development of advanced language capacities, allowing students to communicate (understand, produce and interact) in various circumstances and for various purposes. Students entering grade 10 French immersion language arts already have a functional skill level; the 4 language courses at the senior high level aim to refine these skills. Language is taught in an integrated manner, and skills and strategies are presented and practiced within meaningful contexts that acknowledge diversity. The general objective of these sequential courses is to ensure students have the linguistic capability to communicate with ease and precision in French, with native or near-native speakers, in environments where the operational language is French.

FRE421F – French Immersion Language Arts

This integrated course encourages continued development of language skills, which directly support an increased level of ease and confidence in communication over time, through meaningful practice. Oral and written texts of various genres are studied. Students hone their interaction skills, communicating with increasing complexity and precision.

Prerequisite: Grade 9 French Immersion Language Arts course (early, late or middle immersion).

FRE521F – French Immersion Language Arts

Building on foundational communication skills which were solidified in FRE421F, this course incorporates metacognition and self-evaluation, as strategies to increase ease of communication with increasingly complex, abstract and/or unfamiliar subjects. Students incorporate pertinent details to defend ideas and are able to compare and contrast elements pertaining to abstract elements. Spontaneous communication is increasingly fluid and students are able to advance a conversation through effective use of language functions.

Prerequisite: FRE421F

FRE521G - French Communication and Culture

The content and skill requirements of this course are met through participation in the PEI-Québec Exchange program. Building on foundational communication skills which are solidified in FRE421F or basic communication skills acquired in FRE421A, this course incorporates metacognition and self-evaluation, as strategies to increase ease of communication with increasingly complex, abstract and/or unfamiliar contexts through an immersion experience. The context of the exchange provides an additional challenge with an unfamiliar, authentic francophone environment. It also provides meaningful opportunities for students to develop 21st century transdisciplinary skills and experience intense personal development. In order to register for this course, students must apply to the exchange program in accordance with associated deadlines and requirements, and if selected, must agree to terms of participation. Interested students should consult a teacher/counselor for course planning purposes. For more information, please contact the program coordinator.

Prerequisite: FRE421F (immersion students only), FRE421A (core French students only)

FRE621F – French Immersion Language Arts

This course is the point of culmination for French language development in the K-12 system. The expectations for receptive and expressive language capacities are rigorous, and this is matched with increasing autonomy of students in their own learning. Expressive language capacities are demonstrated through the construction of clear, precise texts, which effectively justify understanding of abstract ideas with conviction. Students are able to adapt their language register spontaneously, and with ease, in order to provide a synthesis or argument in various contexts, including comparing and critiquing literature of various genres.

Prerequisite: FRE521F OR FRE521G

FRENCH LANGUAGE SOCIAL STUDIES

Social studies is an opportunity for students to understand the world in which they live. Skills that students develop in social studies are useful in their entire academic career and beyond, including developing the ability to think critically; retrieving and processing information; applying knowledge; and communicating effectively orally and in writing. These goals are reflected in The Philosophy of Education for P.E.I., and they form the backbone of the French Immersion Social Studies Programs.

While all intermediate level students take the same courses within the social studies program, this cannot be said for Grades 10, 11, and 12. A glance at the high school courses listed below reveals six options from which schools may presently choose.

Courses such as Canadian History, Economics, the Individual in Society and Law give students an understanding of not only the workings of Canadian society but also brings them to explore their roles and responsibilities as citizens. Two other options are also available: Exploring Civilizations and Global issues which complements social studies concepts introduced in grades 7, 8, and 9.

Schools have the task of selecting options which best meet the needs of their French immersion students.

Schools are not limited to offering one French social studies course per grade level; moreover, Grade 10 students should not be restricted to 400 level courses, nor should Grade 11 and 12 students be limited to 500 or 600 level courses. Students should have the opportunity to take higher or lower level courses than their actual grade level. Students should realize, however, that a higher level course will be intellectually more challenging.

CIV621F – Exploring Civilizations/Civilisations comparées

This course is designed to explore the many factors that shape societies from their beginning to the present time. Students will be asked to participate actively in the study of the role played by economics, politics, science, spirituality, and various forms of artistic expressions. They will have the opportunity to learn and apply research methodologies to understand the large variety of civilizations that surround them and influence their lives.

ECO621F - Economics/L'économie

This course will provide students with an understanding of our economic system and the various forces that affect individual, collective, organizational, and social decision-making in our society. It will introduce basic economic concepts that serve as a foundation to economic inquiry, reasoning, and analysis. Major areas of study are basic economic concepts, microeconomics, macroeconomics, and international economics. A final component of the course requires students to select a topic of investigation and conduct a research project.

GEO621F – Global Issues/Les enjeux mondiaux

This course is designed as an inquiry-based study of world issues. Students will begin the course by exploring the concept of "global issue" and the reasons why society becomes actively involved in global issues. Course content is flexible to allow teachers and students to take advantage of selecting timely topics or areas of special interest.

With guidance and teacher-directed models, students will learn to follow an inquiry process within their own investigations of global issues, thereby developing academic research and literacy skills that will be applicable in many areas of study. A final component of the course requires students to participate in an

active citizenship role where they will plan and carry-out an action plan to bring about positive change related to a current issue, either local or global. Assessment of this course will be mainly process-oriented due to the emphasis on skill-building.

Final research products will be evaluated for quality of content as well as process.

HIS421G – Canadian History/Histoire du Canada

This course has been developed around the fundamental concept of citizenship. Its aim is to engage students in the process of historical thinking and exploration. As students find themselves encouraged or lead by essential questioning, they are required to study Canadian history from the first Aboriginal settlements to today's preoccupations.

The main objective of this course is to promote the development of historic conscience in order to enable students to understand better contemporary Canada.

LAW521F – Canadian Law/Le droit

This is an introductory law course designed to give students an overview of the following legal topics: introduction to the Canadian legal system, rights of the individual, criminal law, civil law, the Young Offenders Act, family law, the law on drugs and alcohol, and immigration laws. Students will be expected to research and examine current legal issues and case studies.

SOC621F - The Individual in Society/L'individu en société

This course is an introduction to social and psychological issues. It is designed to develop students' understanding of society and/or their own needs and motivations. Students will learn social science research procedures involving experiments, surveys, and reports. Learning activities also include discussions, debates, role-playing, case studies, and exposure to a variety of print and non-print media.

The course embraces four major themes:

- Human Communication;
- Social Institutions:
- The Impact of Culture;
- The Individual in Society.

Optional Themes

- Prejudice and Discrimination;
- The Economically Underprivileged in Society.

OTHER FRENCH IMMERSION COURSES

CAR421F – Career Education/Éducation à la carrière

Career Education is a course which enables students to develop the skills they need to become self-directed individuals who set goals, make thoughtful decisions, and take responsibility for pursuing their goals throughout life. Students will explore a wide range of post-secondary education and career options, develop financial literacy skills related to pursuing their education and career goals, and begin planning for their transition beyond secondary school.

The course provides relevant and experiential learning opportunities, helping students relate their learning in school to the demands of the working world and the expectations of society. It also provides opportunities for students to develop skills, attitudes, and behaviors that will allow them to manage their lives more purposefully and effectively, enhance their personal well-being, and realize their full potential.

MAT421F – Foundations of Mathematics and Pre-Calculus 10/Fondements et pré-calcul 10

This is an introductory academic high school mathematics course which is a prerequisite for all other academic mathematics courses. Included are such topics as measurement systems, surface area and volume, right triangle trigonometry, exponents and radicals, polynomials, linear relations and functions, linear equations and graphs, and solving systems of linear equations.

It is recommended that students in this course have a strong background in grade nine mathematics.

SCI421F - Science/Les sciences

This course introduces students to topics that are relevant in today's world. It should inspire students to continue their study in the sciences in later years.

The units of study include:

- Properties of matter
- Transformations of matter
- Organization of matter
- Diversity of life
- Characteristics of Earth
- Geological and geophysical phenomena
- Astronomical phenomena

^{*}Please note that each school should have nine pieces per grade level (which should have been ordered during the implementation stage). These pieces are listed for replacement purposes of already existing pieces that are in each school or for new music programs that are being started in the senior high schools. If classes have expanded in size, schools are able to order additional copies.

The High School Carpentry courses use the Individual Learning Modules (ILM's), based on Alberta's apprenticeship course outlines. These ILM's are intended to provide apprentices with standardized learning materials that are current and meet industry standards. To request printed copies of the ILM booklets listed below, contact the PEI CTE/Exploratories Curriculum Leader.

| Common ILM Course Modules | ILM# | Version | Pages |
|--|----------|---------|-------|
| Safety Legislation, Regulations and Industry Policy in the | | | |

Additional Notes for Media

A copy of the videotape series Inside the Box has been sent to each teacher of this course. This series examines several types of programming for television. This material is meant to be used as supplementary material for the course. Please preview these tapes before presenting them to the students as some of the material is controversial.

Note for all Physical Education Courses

A copy of the Prince Edward Island Physical Education Safety Guidelines document should be available in the gymnasium area. The intent of these guidelines is to focus the teacher's attention on safe instructional practices for all physical education and activity in order to minimize the inherent element of risk. The guidelines are mandatory.

There is funding support which is pre-approved by the Department of Education and Lifelong Learning which authorizes alternative environment learning experiences. Please contact the Physical Education Leader for more details.
